

## JOURNALS PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY

**Bulletin of the American Mathematical Society** is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, and has a department of research announcements. Invited addresses offered for publication should be sent to HANS F. WEINBERGER, Department of Mathematics, University of Minnesota, Minneapolis, Minnesota 55455. Book reviews should be sent to GIAN-CARLO ROTA, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139. Research announcements should be sent directly to a member of the Council of the American Mathematical Society. All other correspondence about research announcements should be sent to MURRAY H. PROTTER, Department of Mathematics, University of California, Berkeley, California 94720. A list of members of the Council for 1972 is listed on the inside back cover. All other communications to the editors should be sent to the Managing Editor, MURRAY H. PROTTER.

The first page of each article, including research announcements, that is submitted for publication should bear a *descriptive title* which should be short, but informative. Useless or vague phrases such as "some remarks about" or "concerning" should be avoided. Before the first footnote, there should be the *AMS (MOS) subject classification numbers* representing the primary and secondary subjects of the article. If a list of *key words and phrases* describing the subject matter of the article is included, it will also be printed as a footnote on the first page. The AMS (MOS) Subject Classification Scheme (1970) with instructions for its use can be found as an appendix to MATHEMATICAL REVIEWS, index to volume 39 (1970). See the June 1970 NOTICES for more details, as well as illustrative examples. The subscription price is \$14 per annual volume of six numbers.

When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

**BULLETIN:** BACKLOG. NONE. 90% of the papers currently being communicated by the editors will be published in 5-6 months.

**Proceedings of the American Mathematical Society** is a monthly journal devoted entirely to research in pure and applied mathematics, principally to the publication of original papers of moderate length. A department called Shorter Notes was established for the purpose of publishing very short papers of an unusually elegant and polished character for which there is normally no other outlet. Papers in algebra, number theory, and algebraic geometry should be sent to GEORGE B. SELIGMAN, Department of Mathematics, Yale University, New Haven, Connecticut 06520 or to JOSEPH J. ROTMAN, Department of Mathematics, University of Illinois, Urbana, Illinois 61801; in modern or classical analysis to JACOB FELDMAN, Department of Mathematics, University of California, Berkeley, California 94720, to LEE A. RUBEL, Department of Mathematics, University of Illinois, Urbana, Illinois 61801 or to ALLEN L. SHIELDS, Department of Mathematics, University of Michigan, Ann Arbor, Michigan 48104; in set-theoretic and general topology to W. WISTAR COMFORT, Department of Mathematics, Wesleyan University, Middletown, Connecticut 06457; in algebraic topology and all other geometry to GLEN E. BREDON, Department of Mathematics, Rutgers University, New Brunswick, New Jersey 08903; in applied mathematics, differential equations, and related areas of analysis to FRED G. BRAUER, Department of Mathematics, University of Wisconsin, Madison, Wisconsin 53706; in probability, statistics, and related fields to JAMES D. KUELBS, Department of Mathematics, 213 Van Vleck Hall, University of Wisconsin, Madison, Wisconsin 53706; in logic, set theory, and related areas to ROBERT I. SOARE, Department of Mathematics, University of Illinois at Chicago Circle, Chicago, Illinois 60680; in combinatorics and related areas of discrete mathematics to JAY R. GOLDMAN, School of Mathematics, University of Minnesota, Minneapolis, Minnesota 55455. All other communications should be addressed to the Managing Editor, JOSEPH J. ROTMAN.

**Mathematics of Computation** is a quarterly journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices, and other aids to computation. In addition, reviews and notes in these and related fields are published. Prospective publications should be sent to the Editor, EUGENE ISAACSON, Courant Institute of Mathematical Sciences, New York University, 251 Mercer Street, New York, New York 10012.

**Mathematical Reviews** is a monthly journal devoted to abstracts and reviews of the current mathematical literature of the world. Each volume consists of six regular issues plus an index issue. Abstracts and reviews are grouped under subject headings.

**Transactions of the American Mathematical Society** is a monthly journal devoted entirely to research in pure and applied mathematics and, in general, includes longer papers than those in the PROCEEDINGS. Papers in analysis and applied mathematics should be sent to FRANÇOIS TREVES, Department of Mathematics, Rutgers University, New Brunswick, New Jersey 08903; in topology to STEVE ARMENTROUT, Department of Mathematics, Pennsylvania State University, University Park, Pennsylvania 16802; in algebra, number theory, and logic to DOCK S. RIM, Department of Mathematics, University of Pennsylvania, Philadelphia, Pennsylvania 19104; in geometry and abstract analysis to SHLOMO STERNBERG, Department of Mathematics, Harvard University, Cambridge, Massachusetts 02138; in statistics and probability to HARRY KESTEN, Department of Mathematics, Cornell University, Ithaca, New York 14850; in mathematical logic and foundations to ALISTAIR H. LACHLAN, Department of Mathematics, Simon Fraser University, Burnaby 2, British Columbia, Canada. All other communications to the editors should be addressed to the Managing Editor, STEVE ARMENTROUT.

**Memoirs of the American Mathematical Society** constitute a series of paperbound research tracts which are of the same general character as the papers published in the TRANSACTIONS. An issue of the MEMOIRS contains either a single monograph or a group of cognate papers. Information on preparation of camera copy and charges for publication may be obtained by writing to the Editorial Department of the American Mathematical Society. Papers should be sent to the appropriate editor of TRANSACTIONS.

**Notices of the American Mathematical Society**, published eight times a year, announces the programs of the meetings of the Society. The NOTICES carries the abstracts of all contributed papers presented at the meetings of the Society and publishes news items of interest to mathematical scientists. All communications should be addressed to the Editor, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02904. News items and insertions for each issue must be in the hands of the editor on or before the deadline for the abstracts for the papers to be presented in the meetings announced in that issue. These deadlines are published regularly on the inside front cover.

**Soviet Mathematics—Doklady** is a bimonthly translation journal containing the entire pure mathematics section of the DOKLADY AKADEMIJ NAUK SSR, the reports of the Academy of Sciences of the USSR. DOKLADY publishes about 500 articles a year, each about four pages long.

**Mathematics of the USSR—Izvestija**, a bimonthly journal, is a cover-to-cover translation of IZVESTIJA AKADEMIJ NAUK SSSR SERIJA MATEMATIČESKAJA, published by the Academy of Sciences of the USSR. This is a journal of current research in all fields of pure mathematics.

**Mathematics of the USSR—Sbornik** is a monthly journal and is a cover-to-cover translation of MATEMATIČESKIJ SBORNIK (NOVAJA SERIJA), published by the Moscow Mathematical Society and the Academy of Sciences of the USSR. This is a journal of current research in all fields of pure mathematics.

## CURRENT AWARENESS SERVICES

**Contents of Contemporary Mathematical Journals and New Publications**, published bi-weekly, reproduces the tables of contents of approximately 250 mathematical journals. Every other month this journal carries announcements of new books and journals in all fields of higher mathematics and a section on both forthcoming and recently published books.

W. V. Petryshyn and T. E. Williamson, Jr. A necessary and sufficient condition for the convergence of a sequence of iterates for quasi-nonexpansive mappings . . . . .	1027

### Members of the Council for 1972

Richard D. Anderson, Steve Armentrout, Michael Artin, Michael F. Atiyah, Robert G. Bartle, Hyman Bass, Paul T. Bateman, Fred G. Brauer, Glen E. Bredon, William Browder, Edgar H. Brown, Jr., R. Creighton Buck, Alberto P. Calderón, George F. Carrier, S. S. Chern, W. Wistar Comfort, Morton L. Curtis, Jacob Feldman, Frederick W. Gehring, Oscar Goldman, Walter H. Gottschalk, Orville G. Harrold, Jr., Philip Hartman, Eugene Isaacson, Nathan Jacobson, Harry Kesten, Alistair H. Lachlan, C. C. Lin, Saunders Mac Lane, W. T. Martin, Calvin C. Moore, P. S. Mostert, Richard S. Pierce, Everett Pitcher, Murray H. Protter, Dock S. Rim, Alex Rosenberg, Kenneth A. Ross, Gian-Carlo Rota, Joseph J. Rotman, Lee A. Rubel, Mary Ellen Rudin, Robert T. Seeley, George B. Seligman, James B. Serrin, Edwin H. Spanier, Elias M. Stein, Shlomo Sternberg, Dorothy Maharam Stone, Olga Taussky Todd, François Trèves, Hans F. Weinberger, Bertram Yood.

# CONTENTS

NOVEMBER, 1972

C. W. McArthur. Developments in Schauder basis theory . . . . .	877
J. W. Neuberger. Quasi-analyticity and semigroups . . . . .	909
J. W. Robbin. Topological conjugacy and structural stability for discrete dynamical systems . . . . .	923
James Keesling. Review of "Dimension Theory" by Keiô Nagami	953
Frank B. Knight. Review of "Diffusion Processes and their Sample Paths" by Kiyosi Ito and Henry P. McKean, Jr. . . . .	956
V. Arnold. Review of "Celestial Mechanics. I, II" by Shlomo Sternberg . . . . .	962
The June Meeting in Seattle . . . . .	964
J. S. Montague and R. J. Plemmons. Convex matrix equations . .	965
David Kinderlehrer. How a minimal surface leaves an obstacle	969
Kai Wang. Differentiable actions on $2n$ -spheres . . . . .	971
Bruno Brosowski and Frank Deutsch. Some new continuity con- cepts for metric projections . . . . .	974
Lowell Edwin Jones. Three characteristic classes measuring the obstruction to PL local unknottedness . . . . .	979
Daniel S. Kahn and Stewart B. Priddy. Applications of the transfer to stable homotopy theory . . . . .	981
David Ruelle. Statistical mechanics on a compact set with $Z^v$ action satisfying expansiveness and specification . . . . .	988
A. J. Lazar and D. C. Taylor. Double centralizers of Pedersen's ideal of a $C^*$ -algebra . . . . .	992
Robert P. Gilbert and Gerald N. Hile. Generalized hyperanalytic function theory . . . . .	998
Joan S. Birman and Hugh M. Hilden. Isotopies of homeomor- phisms of Riemann surfaces and a theorem about Artin's braid group . . . . .	1002
Allen E. Hatcher. The second obstruction for pseudo-isotopies . .	1005
Ross Geoghegan and R. Richard Summerhill. Infinite-dimensional methods in finite-dimensional geometric topology . . . . .	1009
Alberto Torchinsky. Singular integrals in the spaces $\Lambda(B, X)$ . . . .	1015
J. A. Dyer, E. A. Pedersen and P. Porcelli. An equivalent formula- tion of the invariant subspace conjecture . . . . .	1020
Theodore Chang and Tor Skjelbred. Group actions on Poincaré duality spaces . . . . .	1024
