

Author Index

Amari, S.-I. <i>Information Geometry of estimating functions in semi-parametric statistical models</i>	29
Balaji, S. <i>Recurrence and transience of diffusions in a half space</i>	97
Beibel, M. <i>Sequential change-point detection in continuous time when the post-change drift is unknown</i>	457
Bentkus, V. <i>Berry-Esseen bounds for statistics of weakly dependent samples</i>	329
Bertail, P. <i>Second-order properties of an extrapolated bootstrap without replacement under weak assumptions</i>	149
Bühlmann, P. <i>Sieve bootstrap for time series</i>	123
Chandler, R.E. <i>A spectral method for estimating parameters</i>	301
Csörgő, S. <i>Asymptotic normality of least-squares estimators of tail indices</i>	351
Dacunha-Castelle, D. <i>The estimation of the order of a mixture model</i>	279
Delattre, S. <i>A central limit theorem for normalized functions of the increments of a diffusion process, in the presence of round-off errors</i>	1
Dorea, C.C.Y. <i>Stationary distribution of markov chains in \mathbb{R}^d with application to global random optimization</i>	415
Ferrante, M. <i>An example of a non-Markovian stochastic two-point boundary value problem</i>	371
Gassiat, E. <i>The estimation of the order of a mixture model</i>	279
Götze, F. <i>Berry-Esseen bounds for statistics of weakly dependent samples</i>	329
Greenwood, P.E. <i>The domain of attraction of the α-sun operator for type II and type III distributions</i>	479
Hirth, U.M. <i>A Poisson approximation for the Dirichlet law, the Ewens sampling formula and the Griffiths-Engen-McCloskey law by the Stein-Chen coupling method</i>	225
Hooghiemstra, G. <i>The domain of attraction of the α-sun operator for type II and type III distributions</i>	479
Hu, Y.Y. <i>Extreme lengths in Brownian and Bessel excursions</i>	387
Jacod, J. <i>A central limit theorem for normalized functions of the increments of a diffusion process, in the presence of round-off errors</i>	1
Jørgensen, B. <i>Tauber theory for infinitely divisible variance functions</i>	213
Kawanabe, M. <i>Information Geometry of estimating functions in semi-parametric statistical models</i>	29
Kendall, D.G. <i>Obituary, Boris Vladimirovitch Gnedenko (1912–1995)</i>	121
Klaassen, C.A.J. <i>Efficient estimation of the bivariate normal copula model: normal margins are least favourable</i>	55
Klaassen, C.A.J. <i>Spread, estimators and nuisance parameters</i>	323
Kohatsu-Higa, A. <i>Stochastic differential equations with random coefficients</i>	233
Koul, H.L. <i>Efficient estimation in nonlinear autoregressive time series model</i>	247
Kutoyants, Y.A. <i>Efficiency of the empirical distribution for ergodic diffusion</i>	445
Laurent, B. <i>Estimation of integral functionals of a density and its derivatives</i>	181
León, J.A. <i>Stochastic differential equations with random coefficients</i>	233
Martínez, J.R. <i>Tauber theory for infinitely divisible variance functions</i>	213
Nualart, D. <i>Stochastic differential equations with random coefficients</i>	233
Nualart, D. <i>An example of a non-Markovian stochastic two-point boundary value problem</i>	371
Pettersson, R. <i>Penalization schemes for reflecting stochastic differential equations</i>	403
Pitman, J. <i>Partition structures derived from Brownian motion and stable subordinators</i>	79
Ramasubramanian, S. <i>Recurrence and transience of diffusions in a half space</i>	97
Schick, A. <i>Efficient estimation in nonlinear autoregressive time series model</i>	247
Shi, Z. <i>Extreme lengths in Brownian and Bessel excursions</i>	387
Suhov, Y.M. <i>Obituary, Boris Vladimirovitch Gnedenko (1912–1995)</i>	121
Tikhomirov, A. <i>Berry-Esseen bounds for statistics of weakly dependent samples</i>	329
van den Heuvel, E.R. <i>Spread, estimators and nuisance parameters</i>	323
Viharos, L. <i>Asymptotic normality of least-squares estimators of tail indices</i>	351
Wang, H. <i>Generalized zero-one laws for large-order statistics</i>	429
Wellner, J.A. <i>Efficient estimation of the bivariate normal copula model: normal margins are least favourable</i>	55
