Bernoulli **15**(4), 2009, 1399–1403

Author Index

Ambrosio, L. *On the approximation of mean densities of random closed sets* 1222
Anh, V.V. *Multifractal scaling of products of birth–death processes* 508
Armentano, D. *Random systems of polynomial equations. The expected number of roots under smooth analysis* 249
Aurzada, F. *Small deviations of stable processes and entropy of the associated random operators* 1305

Baldi, P. *Subsampling needlet coefficients on the sphere* 438
Barbosa, E.G. *A note on the Lindeberg condition for convergence to stable laws in Mallows distance* 922
Baringhaus, L. *Nonparametric two-sample tests for increasing convex order* 99
Beran, J. *On approximate pseudo-maximum likelihood estimation for LARCH-processes* 1057
Berti, P. *Rate of convergence of predictive distributions for dependent data* 1351
Bose, A. *Multicolor urn models with reducible replacement matrices* 279
Bouchard, B. *Strong approximations of BSDEs in a domain* 1117
Butucea, C. *Adaptive estimation of linear functionals in the convolution model and applications* 69

Capasso, V. *On the approximation of mean densities of random closed sets* 1222
Chen, S.X. *A goodness-of-fit test for parametric and semi-parametric models in multiresponse regression* 955
Comte, F. *Adaptive estimation of linear functionals in the convolution model and applications* 69
Crimaldi, I. *Rate of convergence of predictive distributions for dependent data* 1351

Dahlhaus, R. *Empirical spectral processes for locally stationary time series* 1
Dasgupta, A. *Multicolor urn models with reducible replacement matrices* 279
Davis, R.A. *The extremogram: A correlogram for extreme events* 977
de Cooman, G. *Exchangeable lower previsions* 721
Dereudre, D. *Campbell equilibrium equation and pseudo-likelihood estimation for non-hereditary Gibbs point processes* 1368
Dette, H. *Optimal designs for dose-finding experiments in toxicity studies* 124
Dette, H. *Asymptotic optimal designs under long-range dependence error structure* 1036
Dombry, C. *Discrete approximation of a stable self-similar stationary increments process* 195
Dorea, C.C.Y. *A note on the Lindeberg condition for convergence to stable laws in Mallows distance* 922
Doukhan, P. *Evaluation for moments of a ratio with application to regression estimation* 1259

Drost, F.C. *The asymptotic structure of nearly unstable non-negative integer-valued AR*(1) *models* 297
Drton, M. *Discrete chain graph models* 736
Dümbgen, L. *Maximum likelihood estimation of a log-concave density and its distribution function: Basic properties and uniform consistency* 40
Durot, C. *Estimating the joint distribution of independent categorical variables via model selection* 475

Geiss, S. *Weak convergence of error processes in discretizations of stochastic integrals and Besov spaces* 925
Goldstein, L. *Efficiency of the maximum partial likelihood estimator for nested case control sampling* 569
Grübel, R. *Nonparametric two-sample tests for increasing convex order* 99
Guillotin-Plantard, N. *Discrete approximation of a stable self-similar stationary increments process* 195

Ha, S. *L_2 boosting in kernel regression* 599
Hall, P. *Tie-respecting bootstrap methods for estimating distributions of sets and functions of eigenvalues* 380
Hall, P. *Nonparametric "regression" when errors are positioned at end-points* 614
Hallin, M. *Local linear spatial quantile regression* 659
Handa, K. *The two-parameter Poisson–Dirichlet point process* 1082

Iksanov, A. *On the number of collisions in beta*(2*, b*)*-coalescents* 829
Ing, C.-K. *Toward optimal multistep forecasts in non-stationary autoregressions* 402

Jankowski, H.K. *Nonparametric estimation of a convex bathtub-shaped hazard function* 1010
Jien, Y.-J. *Stochastic differential equations driven by fractional Brownian motions* 846
Joulin, A. *A new Poisson-type deviation inequality for Markov jump processes with positive Wasserstein curvature* 532

Kato, S. *A distribution for a pair of unit vectors generated by Brownian motion* 898
Kerkyacharian, G. *Subsampling needlet coefficients on the sphere* 438
Kim, M. *Test for tail index change in stationary time series with Pareto-type marginal distribution* 325
Koltchinskii, V. *The Dantzig selector and sparsity oracle inequalities* 799
Kumon, M. *A new formulation of asset trading games in continuous time with essential forcing of variation exponent* 1243

Lang, G. *Evaluation for moments of a ratio with application to regression estimation* 1259
Lavancier, F. *Campbell equilibrium equation and pseudo-likelihood estimation for non-hereditary Gibbs point processes* 1368

Lebarbier, E. *Estimating the joint distribution of independent categorical variables via model selection* 475
Lee, S. *Test for tail index change in stationary time series with Pareto-type marginal distribution* 325
Lee, Y.K. *Tie-respecting bootstrap methods for estimating distributions of sets and functions of eigenvalues* 380
Lee, Y.K. *L_2 boosting in kernel regression* 599
Leonenko, N. *Asymptotic optimal designs under long-range dependence error structure* 1036
Leonenko, N.N. *Multifractal scaling of products of birth–death processes* 508
Lifshits, M. *Small deviations of stable processes and entropy of the associated random operators* 1305
Lin, J.-L. *Toward optimal multistep forecasts in non-stationary autoregressions* 402
Lindberg, C. *Portfolio optimization when expected stock returns are determined by exposure to risk* 464
Linde, W. *Small deviations of stable processes and entropy of the associated random operators* 1305
Lu, Z. *Local linear spatial quantile regression* 659

Ma, J. *Stochastic differential equations driven by fractional Brownian motions* 846
Malouche, D. *Determining full conditional independence by low-order conditioning* 1179
Marinucci, D. *Subsampling needlet coefficients on the sphere* 438
Marynych, A. *On the number of collisions in beta(2, b)-coalescents* 829
Maulik, K. *Multicolor urn models with reducible replacement matrices* 279
McGill, P. *Asymptotics for diffusion first-passage laws* 267
Menozzi, S. *Strong approximations of BSDEs in a domain* 1117
Mikosch, T. *The extremogram: A correlogram for extreme events* 977
Miranda, E. *Exchangeable lower previsions* 721
Möhle, M. *On the number of collisions in beta(2, b)-coalescents* 829

Neumann, M.H. *Nonparametric estimation for Lévy processes from low-frequency observations* 223

Olofsson, P. *Size-biased branching population measures and the multi-type $x \log x$ condition* 1287
Osękowski, A. *Sharp weak-type inequalities for differentially subordinated martingales* 871

Pagès, G. *Approximation of the distribution of a stationary Markov process with application to option pricing* 146
Panloup, F. *Approximation of the distribution of a stationary Markov process with application to option pricing* 146
Paparoditis, E. *Testing temporal constancy of the spectral structure of a time series* 1190
Park, B.U. *Tie-respecting bootstrap methods for estimating distributions of sets and functions of eigenvalues* 380

Park, B.U. *L_2 boosting in kernel regression* 599
Paul, D. *Tie-respecting bootstrap methods for estimating distributions of sets and functions of eigenvalues* 380
Pepelyshev, A. *Optimal designs for dose-finding experiments in toxicity studies* 124
Pepelyshev, A. *Asymptotic optimal designs under long-range dependence error structure* 1036
Picard, D. *Subsampling needlet coefficients on the sphere* 438
Pigorsch, C. *On the definition, stationary distribution and second order structure of positive semidefinite Ornstein–Uhlenbeck type processes* 754
Podolskij, M. *Estimation of volatility functionals in the simultaneous presence of microstructure noise and jumps* 634
Polonik, W. *Empirical spectral processes for locally stationary time series* 1
Pratelli, L. *Rate of convergence of predictive distributions for dependent data* 1351

Quaeghebeur, E. *Exchangeable lower previsions* 721

Reiß, M. *Nonparametric estimation for Lévy processes from low-frequency observations* 223
Rigo, P. *Rate of convergence of predictive distributions for dependent data* 1351
Rigollet, P. *Optimal rates for plug-in estimators of density level sets* 1154
Roberts, G. *Optimal scaling of the random walk Metropolis on elliptically symmetric unimodal targets* 774
Rosenbaum, M. *Integrated volatility and round-off error* 687
Rufibach, K. *Maximum likelihood estimation of a log-concave density and its distribution function: Basic properties and uniform consistency* 40

Schuhmacher, D. *Stein's method and Poisson process approximation for a class of Wasserstein metrics* 550
Schützner, M. *On approximate pseudo-maximum likelihood estimation for LARCH-processes* 1057
Sherlock, C. *Optimal scaling of the random walk Metropolis on elliptically symmetric unimodal targets* 774
Shieh, N.-R. *Multifractal scaling of products of birth–death processes* 508
Stelzer, R. *On the definition, stationary distribution and second order structure of positive semidefinite Ornstein–Uhlenbeck type processes* 754

Takemura, A. *A new formulation of asset trading games in continuous time with essential forcing of variation exponent* 1243
Takeuchi, K. *A new formulation of asset trading games in continuous time with essential forcing of variation exponent* 1243
Tocquet, A.-S. *Estimating the joint distribution of independent categorical variables via model selection* 475
Toivola, A. *Weak convergence of error processes in discretizations of stochastic integrals and Besov spaces* 925
Tsai, H. *On continuous-time autoregressive fractionally integrated moving average processes* 178

van den Akker, R. *The asymptotic structure of nearly unstable non-negative integer-valued AR*(1) *models* 297
Van Keilegom, I. *Nonparametric "regression" when errors are positioned at end-points* 614
Van Keilegom, I. *A goodness-of-fit test for parametric and semi-parametric models in multiresponse regression* 955
Vert, R. *Optimal rates for plug-in estimators of density level sets* 1154
Vetter, M. *Estimation of volatility functionals in the simultaneous presence of microstructure noise and jumps* 634
Villa, E. *On the approximation of mean densities of random closed sets* 1222

Wellner, J.A. *Nonparametric estimation of a convex bathtub-shaped hazard function* 1010
Werker, B.J.M. *The asymptotic structure of nearly unstable non-negative integer-valued AR*(1) *models* 297
Wong, W.K. *Optimal designs for dose-finding experiments in toxicity studies* 124
Wschebor, M. *Random systems of polynomial equations. The expected number of roots under smooth analysis* 249
Wu, Z. *A cluster identification framework illustrated by a filtering model for earthquake occurrences* 357

Xia, A. *On approximation of Markov binomial distributions* 1335
Xia, Y. *A note on the backfitting estimation of additive models* 1148

Yu, K. *Local linear spatial quantile regression* 659
Yu, S.-H. *Toward optimal multistep forecasts in non-stationary autoregressions* 402

Zhang, H. *Efficiency of the maximum partial likelihood estimator for nested case control sampling* 569
Zhang, M. *On approximation of Markov binomial distributions* 1335
Zhigljavsky, A. *Asymptotic optimal designs under long-range dependence error structure* 1036
