

# Contents

## **J. A. FAJARDO**

A criterion for the fuzzy set estimation of the density function.....301

## **A. J. LEMONTE**

The beta log-logistic distribution.....313

## **C. CARONI and P. ECONOMOU**

A hidden competing risk model for censored observations .....333

## **K. TAHATA, K. KOZAI and S. TOMIZAWA**

Partitioning measure of quasi-symmetry for square contingency tables .....353

## **V. V. JUNIOR, F. P. MACHADO and M. ZULUAGA**

The cone percolation on  $\mathbb{T}_d$  .....367

## **C. S. WITHERS and S. NADARAJAH**

The spectral decomposition and inverse of multinomial and negative multinomial covariances.....376

## **G.-S. LEE, K.-H. HONG, C.-K. SON and J.-M. KIM**

Estimation of the proportion of a sensitive attribute based on a two-stage randomized response model with stratified unequal probability sampling.....381

## **N. U. NAIR and P. G. SANKARAN**

Characterizations and time-dependent association measures for bivariate Schur-constant distributions .....409

## **R. J. NIICHEL**

A bivariate CLT under rho-prime mixing .....424

## **K. S. CONCEIÇÃO, R. M. PIRES, F. LOUZADA, M. G. ANDRADE and C. A. R. DINIZ**

A generalized species-area relationship: The Poisson distribution case .....446
