

Contents

| | |
|---|-----|
| A. ASGHARZADEH, H. S. BAKOUCH, S. NADARAJAH and F. SHARAFI A new weighted Lindley distribution with application | 1 |
| V. NAGARAJAH, B. C. SUTRADHAR, V. JOWAHEER and A. BISWAS Inferences in median regression models for asymmetric longitudinal data: A quasi-likelihood approach | 28 |
| L. E. B. SALASAR, J. G. LEITE and F. LOUZADA Likelihood-based inference for population size in a capture–recapture experiment with varying probabilities from occasion to occasion | 47 |
| L. PERICCHI and C. PEREIRA Adaptative significance levels using optimal decision rules: Balancing by weighting the error probabilities | 70 |
| N. NEMATOLLAHI and M. JAFARI JOZANI On risk unbiased estimation after selection | 91 |
| A. S. NASTIĆ, M. M. RISTIĆ and M. S. DJORDJEVIĆ An INAR model with discrete Laplace marginal distributions | 107 |
| C. J. ALBERS, O. J. W. F. KARDAUN and W. SCHAAFSMA Assigning probabilities to hypotheses in the context of a binomial distribution | 127 |
| M. CRUZ-LÓPEZ and A. MURILLO-SALAS A recurrent random walk on the p -adic integers | 145 |
