

# Contents

**V. LEIVA-YAMAGUCHI and F. A. QUINTANA**

A semiparametric Bayesian model for multiple monotonically increasing count sequences ..... 155

**C. LEY and Y. SWAN**

Parametric Stein operators and variance bounds ..... 171

**L. H. VANEGAS and G. A. PAULA**

Log-symmetric distributions: Statistical properties and parameter estimation ..... 196

**E. OMEY and R. VESILO**

Local limit theorems for shock models ..... 221

**D. V. S. SASTRY and D. BHATI**

A new skew logistic distribution: Properties and applications ..... 248

**M. MATSUI and Z. PAWLAS**

Fractional absolute moments of heavy tailed distributions ..... 272

**D. FOUSKAKIS and I. NTZOUFRAS**

Limiting behavior of the Jeffreys power-expected-posterior Bayes factor in Gaussian linear models ..... 299

**J. MA, S. FAN and R. FANG**

On the stability theorem of  $L^p$  solutions for multidimensional BSDEs with uniform continuity generators in  $z$  ..... 321
