INSTRUCTIONS TO AUTHORS

A. General

Papers submitted for publication may be written in English, French or German.
Manuscripts must be in their final form, typed on one side of each sheet only, with double spacing and wide margins. Formulae should be typewritten whenever possible. Mimeographed copies are not acceptable unless clearly legible.
Please include a “Note for the Printer” explaining markings used. See suggestion overleaf.
To speed up publication, authors will receive only one set of proofs: provisionally numbered page proofs. Authors are requested to correct typographical errors only; they will be charged for corrections involving changes, additions or deletions to the original manuscript.
Diagrams should be submitted on separate sheets, not included in the text. They should be drawn in Indian ink in clean uniform lines, the whole about twice the size of the finished illustration. Inscriptions should allow for the figure 1, for example, to be about 2 mm high in the final version (i.e. 4 mm for reduction $\times \frac{1}{2}$). The author should mark in the margin of the manuscript where diagrams may be inserted.
Footnotes, other than those which refer to the title heading, should be numbered consecutively and placed at the foot of the page to which they refer (not at the end of the article).
Please give on the first page of the manuscript a running head (condensed title), which should not exceed 70 letters including spaces.
References to the literature should be listed at the end of the manuscript. The following information should be provided for journal articles: names and initials of all authors, name of the journal, volume, first and last page numbers and year of publication. References to books should include name(s) of author(s), full title, edition, place of publication, publisher and year of publication.

Examples

B. Marking

1. Text

The words "Theorem", "Lemma", "Corollary", "Proposition" etc. are normally printed in \textbf{boldface}, followed by the formulation in \textit{italics} (to be underlined in the manuscript).

The words "Proof", "Remark", "Definition", "Note" etc. are printed in \textit{italics} with the formulation in ordinary typeface.

Words or sentences to be set in italics should be marked by single underlining.

2. Formulae

Letters in formulae are normally printed in \textit{italics}, figures in ordinary typeface.

It will help the printer if in doubtful cases the position of indices and exponents is marked thus: $b^\gamma$, $a^V$. Spacing of indices and exponents must be specially indicated ($A^{\alpha_n}$) otherwise they will be set ($A_{\alpha_n}$).

Underlining for special alphabets and typefaces should be done according to the following code:

- single underlining: small letter, capital letter, boldface headings, boldface letters in formulae
- double underlining: small letter
- brown: \textit{upright} (abbreviations e.g. Re, Im, log, sin, ord, id, lim, sup, etc.)
- yellow: Greek
- green: Gothic
- violet: the numeral 1, and zero (to distinguish them from the small letter \(l\) and the capital letter \(O\))

The following are frequently confused:

- \(u, U, \cup, \cup, o, O, \cap \times, x, X, \kappa\)
- \(v, v, v, \theta, \Theta, \varphi, \Phi, \varnothing; \psi, \Psi; \varepsilon, \varepsilon; \alpha, \alpha\)

Also the handwritten Roman letters:

- \(c, C; e, l; i, J; k, K; o, O; p, P; s, S; t, u, U; v, V; w, W; x, X; z, Z; \)

Please take care to distinguish them in some way.

C. Examples

1. Special alphabets or typefaces

| Script | \(\mathcal{A}, \mathcal{B}, \mathcal{C}, \mathcal{D}, \mathcal{E}, \mathcal{F}, \mathcal{G}, \mathcal{H}, \mathcal{I}, \mathcal{J}, \mathcal{K}, \mathcal{L}, \mathcal{M}, \mathcal{N}, \mathcal{O}, \mathcal{P}, \mathcal{Q}, \mathcal{R}, \mathcal{S}, \mathcal{T}, \mathcal{U}, \mathcal{V}, \mathcal{W}, \mathcal{X}, \mathcal{Y}, \mathcal{Z}\) |
|--------|
| Gothic | \(\mathcal{A}, \mathcal{B}, \mathcal{C}, \mathcal{D}, \mathcal{E}, \mathcal{F}, \mathcal{G}, \mathcal{H}, \mathcal{I}, \mathcal{J}, \mathcal{K}, \mathcal{L}, \mathcal{M}, \mathcal{N}, \mathcal{O}, P, Q, R, S, T, U, V, W, X, Y, Z\) |
| Special Roman | \(\Gamma, \Delta, \Theta, \varphi, \varphi, \Phi, \Psi, \Omega\) |
| Greek | \(\alpha, \beta, \gamma, \delta, \varepsilon, \zeta, \eta, \theta, \vartheta, \iota, \kappa, \lambda, \mu, \nu, \xi, \pi, \rho, \sigma, \tau, \upsilon, \phi, \varphi, \chi, \psi, \omega\) |

the most widely used scientific information system in the world

Try any edition free for 4 weeks.

Nearly 200,000 professionals of all types use the Current Contents® system every week to locate and obtain new journal articles relevant to their work. And they've got good reasons.

Current Contents is the most comprehensive, least complicated way to make sure you learn of new developments in your field while they're still new. Just an hour a week spent scanning any edition of Current Contents lets you sort through everything that's published in a thousand or more journals. With CC® it's easy to pick out just those articles you want to read. Without handling the journals. Without increasing your journal subscription expenses.

Find out why so many people like you use Current Contents. Get more information and a free 4-week subscription by completing the coupon.

Please start my free 4-week subscription to the Current Contents® edition checked below:
