A Note to Subscribers and Authors

An unexpectedly large increase in the number of high-quality manuscripts submitted to our journal in recent months makes it necessary to publish an additional volume (Vol. 86) in 1982. Even though this decision was made with considerable hesitation, our primary concern was not to delay the appearance of these papers, because our authors and readers are equally appreciative of the rapid publication of scientific data.

We hope that our authors will appreciate this decision and also that our subscribers will lend us their continuing support.
