

A. General

In upper right corner of title page **write by hand** "For CMP".

Manuscripts should be submitted in duplicate. They should preferably be written in English; papers in French or German are also accepted.

Manuscripts must be in their **final form**, typed on one side of each sheet only, with double spacing and wide margins. Formulae should be typewritten whenever possible. Mimeographed copies are not acceptable unless clearly legible.

Please include a "Note for the Printer" explaining markings used. See suggestion overleaf.

To speed up publication, authors will receive **only one set of proofs**: provisionally numbered page proofs. Authors are requested to **correct typographical errors only**; they will be charged for corrections involving changes, additions or deletions to the original manuscript.

Equations should be typewritten whenever possible. Even if you use a sophisticated typewriter, some parts of your manuscript will have to be marked to avoid misunderstandings and mistakes. If there is no difference in size, special attention should be given to the placing of subscripts and superscripts so that they are recognizable as such. Please avoid multilevel formulas, subscripts, or superscripts, whenever possible (see overleaf).

Diagrams should be submitted on separate sheets, not included in the text. They should be drawn in Indian ink in clean uniform lines, the whole about twice the size of the finished illustration. Inscriptions should allow for the figure 1, for example, to be about 2 mm high in the final version (i.e. 4 mm for reduction $\times \frac{1}{2}$). The author should mark in the margin of the manuscript where diagrams may be inserted.

Footnotes, other than those which refer to the title heading, should be numbered consequently and placed at the foot of the page to which they refer (not at the end of the article).

Please give on the first page of the manuscript a **running head** (condensed title), which should not exceed 70 letters including spaces.

References to the literature should be listed at the end of the manuscript. The following information should be provided for **journal articles**: names and initials of all authors, name of the journal, volume, first and last page numbers and year of publication. It is suggested that authors give complete titles of articles referred to. References to **books** should include name(s) of author(s), full title, edition, place of publication, publisher and year of publication.

Examples

Haag, R., Swieca, J.A.: When does a quantum field theory describe particles?
Commun. Math. Phys. **1**, 308–320 (1965)

Glimm, J., Jaffe, A.: Quantum physics. A functional integral point of view. Berlin, Heidelberg, New York: Springer 1981

B. Marking

1. Text

The words “**Theorem**”, “**Lemma**”, “**Corollary**”, “**Proposition**” etc. are normally printed in **boldface**, followed by *the formulation in italics (to be underlined by the author in the manuscript)*.

The words “*Proof*”, “*Remark*”, “*Definition*”, “*Note*” etc. are printed in *italics* with the formulation in ordinary typeface.

Words or sentences to be set in italics should be marked by single underlining.

2. Formulas

Letters in formulas are normally printed in *italics*, figures in ordinary typeface.

It will help the printer if in doubtful cases the position of indices and exponents is marked thus: $b_j^i, a^{\frac{1}{j}}$. Spacing of indices and exponents must be specially indicated (A_m^n) otherwise they will be set (A_{mn}^{mm}).

Underlining for special alphabets and typefaces should be done according to the following code:

single underlining:	small letter
double underlining:	capital letter
brown:	boldface headings, boldface letters in formulas
yellow:	upright (abbreviations e.g. Rc, Im, log, sin, ord, id, lim, sup, etc.)
red:	Greek
blue:	Gothic
green:	Script
violet:	the numeral 1, and zero (to distinguish them from the small letter <i>l</i> and the capital letter <i>O</i>)
orange:	Special Roman

The following are frequently confused:

$\cup, u, \bigcup, U; \circ, o, O, 0; \times, x, X, \kappa; \vee, v, v; \theta, \Theta, \phi, \varphi, \Phi, \theta; \psi, \Psi; \varepsilon, \epsilon;$

$a', a^1;$ the symbol a and the indefinite article a ;

also the handwritten Roman letters:

$c, C; e, l; I, J; k, K; o, O; p, P; s, S; u, U; v, V; w, W; x, X; z, Z;$

Please take care to distinguish them in some way.

C. Examples

1. Special alphabets or typefaces

Script	<i>A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z</i> <i>a, b, c, d, e, f, g, h, i, j, k, l, m, n, o, p, q, r, s, t, u, v, w, x, y, z</i>
Sanserif	A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z a, b, c, d, e, f, g, h, i, j, k, l, m, n, o, p, q, r, s, t, u, v, w, x, y, z
Gothic	A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z a, b, c, d, e, f, g, h, i, j, k, l, m, n, o, p, q, r, s, t, u, v, w, x, y, z
Boldface	A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z a, b, c, d, e, f, g, h, i, j, k, l, m, n, o, p, q, r, s, t, u, v, w, x, y, z
Special Roman	A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z, 1
Greek	$\Gamma, \Delta, \Theta, \Lambda, \Xi, \Pi, \Sigma, \Phi, \Psi, \Omega$ $\alpha, \beta, \gamma, \delta, \varepsilon, \zeta, \eta, \theta, \vartheta, \iota, \kappa, \lambda, \mu, \nu, \xi, \omicron, \pi, \rho, \sigma, \tau, \upsilon, \varphi, \phi, \chi, \psi, \omega$

2. Notations

preferred form	instead of	preferred form	instead of
$A^*, \tilde{b}, \gamma', \mathbf{v}$	$\bar{A}, \tilde{b}, \check{\gamma}, \tilde{v}$	$f: A \rightarrow B$	$A \xrightarrow{f} B$
lim sup, lim inf	$\overline{\lim}, \underline{\lim}$		$\cos \frac{1}{x}$
inj lim, proj lim	$\overleftarrow{\lim}, \overrightarrow{\lim}$	$\cos(1/x)$	$\sqrt{a + \frac{b}{x}}$
$\exp(-(x^2 + y^2)/a^2)$	$e^{-\frac{x^2 + y^2}{a^2}}$	$(a + b/x)^{1/2}$	
f^{-1}	f^{-1}		

Authors of this journal can benefit from library and photocopy fees collected by VG WORT if certain conditions are met. If an author lives in the Federal Republic of Germany or in West Berlin, it is recommended that he contact Verwertungsgesellschaft WORT, Abteilung Wissenschaft, Goethestrasse 49, D-8000 München 2, for detailed information.

Problem Books in Mathematics

Series Editor: P. R. Halmos

The heart of mathematics is not abstract generalities but concrete problems.

As Paul Halmos, editor of the new *Problem Books in Mathematics* series, says, they help in proselytizing, in teaching, and research. They are the best way to show a young student, a prospective mathematics major, what his subject is about. And for researchers, whose work is almost by definition concerned with problems, their hardest problem is to formulate the right problem.

Springer-Verlag's *Problem Books in Mathematics* will be devoted exclusively to problems, challenging, difficult, but accessible problems. To appear on a regular basis, the books in this series are intended to help at all levels – in college, in graduate school, and in the profession. Their prototypes can be found in the "Otto Dunkel Memorial Problem Book" on the elementary level and Pólya and Szegő's "Problems and Theorems in Analysis" on the advanced level. On the research level, the models are the rare publications dealing with Hilbert's famous 23 problems.

Interesting subjects not yet adequately treated elsewhere; collections of problems that have been discovered, or gathered carefully together over the years: these are examples of what the reader can expect to find in *Problem Books in Mathematics*.

B. Gelbaum

Problems in Analysis

1982. Approx. 9 figures. Approx. 225 pages
Cloth DM 74,-; approx. US \$ 30.90
ISBN 3-540-90692-4

This new collection of mathematical problems is conceived as a supplement to the classic *Problems and Theorems in Analysis* by Pólya and Szegő (published by Springer in 1925). Dr. Gelbaum presents 518 problems in real and complex variables – including material not found in standard treatises – geared for graduate or advanced undergraduate students in mathematics and physical sciences. The emphasis is on the practical application of the standard theorems and techniques of analysis to problems which might be encountered in the field.

Unsolved Problems in Intuitive Mathematics

Volume 1
R. K. Guy

Unsolved Problems in Number Theory

1981. 17 figures. XVIII, 161 pages
Cloth DM 42,-; approx. US \$ 17.60
ISBN 3-540-90593-6

Unsolved Problems in Number Theory brings together 178 open questions organized into six categories: prime numbers, divisibility, additive number theory, Diophantine equations, sequences of integers, and miscellaneous.

In addition to being the first release in Springer's new *Problem Book* series, this publication is the initial installment of a multi-volume project by H. T. Croft (Cambridge University), and Richard K. Guy (the University of Calgary), entitled *Unsolved Problems in Number Theory*.

A. A. Kirillov, A. D. Gvishiani

Theorems and Problems in Functional Analysis

Translated from the Russian by H. H. McFaden
1982. 6 figures. IX, 347 pages
Cloth DM 98,-; approx. US \$ 40.90
ISBN 3-540-90638-X

Here, in a well-organized volume of manageable size, are theory, problems, and hints to solutions covering practically all the material on functional analysis which would be studied at the university level. In addition to the standard material, advanced topics such as categorical language, index theory, harmonic analysis are included.

D. J. Newman

A Problem Seminar

1982. Approx. 100 pages
ISBN 3-540-90765-3
In preparation

This unique collection of problems on the advanced undergraduate level originates from Donald J. Newman's problem seminar.

There is no common topical thread through this collection other than the author's fresh and non-technical approach to mathematical problems. The book should go a long way towards restoring legitimacy, substance, and most importantly, fun to the practice of problem solving. The text can be used in conjunction with the usual theoretical courses such as real variables, complex variables, or combinatorics. It offers witty and incisive illustrations of perspectives which are otherwise highly abstract and theoretical.
