

Instructions for Authors

Communications in
**Mathematical
Physics**

The instructions should be read carefully before preparing the manuscript

A. General

Manuscripts should be submitted in **duplicate**:

(i) either to the **Editor** who, in the opinion of the author, is most closely concerned with the subject matter of the paper (this should be the rule);

(ii) or to the **Chief Editor**.

Papers submitted for publication should preferably be written in **English**.

Authors who prepare their papers with **Plain TeX** are encouraged to ask for Springer-Verlag's Plain TeX macropackage, called PJour1 either by writing to Springer-Verlag or by requesting the package by E-mail from:

svserv@dhdspri6.bitnet

LaTeX stylefiles are in preparation.

After the manuscript has been accepted by the editor(s) the author must send in to the **Chief Editor** a disk containing the text in final form as well as any additional macro definitions used by the author, together with a printout for reference. It is important to ensure that the text is identical in the hard copy and in the soft copy. The production time for papers submitted in this form can be reduced considerably.

Authors who have written their papers in TeX but have not, for whatever reasons, used Springer-Verlag's macros should likewise send in a disk and corresponding hard copy. Springer-Verlag will then decide on a case-by-case basis whether it makes sense economically to work from the TeX files.

To facilitate communication between the authors, editors and publisher, the author should furnish a **fax number** and/or **e-mail address** on the title page of the manuscript.

Each paper should be preceded by a **short abstract** in English. A **summary** for *Zentralblatt für Mathematik* should be attached.

Manuscripts must be in their final form and printed on one side of the paper only, in double spacing with wide margins. The author should

also keep a copy of the manuscript. Normally only printer's errors should be corrected in the proofs. A **charge** is made for **extensive changes** not due to typesetting errors, introduced at the proof stage.

Formulae should be printed or typed whenever possible. Dot matrix printer output is not accepted unless clearly legible.

Illustrations and diagrams should be submitted on separate sheets and not included in the text. They should be good quality and drawn in India ink using clean uniform lines. Computer-drawn figures are acceptable provided they are of comparable quality. Lines and curves must be smooth. Lettering 2 mm high is recommended. The publisher reserves the right to reduce or enlarge illustrations and diagrams. The author should indicate in the margin of the manuscript where illustrations and diagrams are to be inserted.

Footnotes, other than those referring to the title of the paper, should be avoided. If absolutely necessary, they should be numbered consecutively and placed at the foot of the page on which they occur (not at the end of the article).

On the first page of the manuscript a short **running title** should be provided (not to exceed 70 characters, including spaces).

The **list of references** at the end of the paper should always be in alphabetical order and include the names and initials of all authors, and years of publication (see examples below). Names of journal and book series should be abbreviated in accordance with the *Zentralblatt für Mathematik*. Whenever possible, please replace all references to papers accepted for publication, preprints or technical reports by the exact name of the journal, as well as the volume, first and last page numbers and year, if the article has already been published or accepted for publication.

When styling references, the following examples should be observed:

Journal article:

1. or [W] Woronowicz, S.L.: Operator equalities related to the Quantum E(2) group. *Commun. Math. Phys.* **144**, 417-428 (1992)

Complete book:

2. or [P-S] Pressley A., Segal, G.: *Loop groups*. Oxford: Clarendon Press 1986

Single contribution in a book:

3. or [M] Mack, G. Introduction to Conformal Invariant Quantum field theory in two or more dimensions. In: 't Hooft, G., Jaffe, A., Mack, G., Mitter, P., Stora, R. (eds.) *Nonperturbative quantum field theory*. Proceedings, Cargese 1987, pp. 353-383. New York, London: Plenum Press 1988

Citations in the text should be either (a) by numbers in square brackets, e.g., [1], or Bombieri and Giusti [1], referring to an alphabetically ordered and numbered list, or (b) by the author's initials in square brackets, e.g., [B-G], or (c) by author and year in parentheses, e.g., Bombieri and Giusti (1971). Any one of these styles is acceptable if used *consistently* throughout the paper. In the third system, if there are two authors, both should be named, e.g., Agar and Douglas (1955); if a work with more than two authors is cited, only the first author's name plus „et al.“ need be given; e.g., Komor et al. (1979); if there is more than one reference by the same author or team of authors in the same year, then a, b, c, etc. should be added after the year both in the text and in the list of references.

Offprints may be ordered at cost price when the page proofs are returned.

B. Marking-up the manuscript

1. Text

The words “**Theorem**”, “**Lemma**”, “**Corollary**”, “**Proposition**” etc. are normally printed in **boldface**, followed by the formulation in *italics* (or, if italic script is not available, underlined with a single straight line) and with the end clearly indicated. The words “*Proof*”, “*Remark*”, “*Example*”, “*Note*”, etc. are prin-

ted in *italics* with the formulation in ordinary (roman) typeface, and **Definition** in boldface. The text of the definition itself should be in roman except for the concept defined, which should be in *italics*. If any text in the manuscript is underlined and should be printed with this underlining, a remark explaining this must be attached.

2. Formulae

Letters in *formulae* are printed in *italics* and figures in roman if not marked otherwise. It will help the printer if in doubtful cases the position of indices and exponents is marked thus: h_{β}^{α} , a^{ψ} . Spacing of indices and exponents must be specially indicated ($A_{m n}^{m n}$) otherwise they will be set (A_{mn}^{mn}).

The following are frequently confused and should be made unambiguous:

$\cup, U, \bigcup, U; \circ, o, O, 0; \times, x, X, \chi, \kappa; \vee, v, V; \theta, \Theta, \phi, \varphi, \Phi, \emptyset, \emptyset; \psi, \Psi; \varepsilon, \epsilon;$

a', a^1 , the symbol a and the indefinite article a ; also handwritten letters:

$c, C; e, l; I, J; k, K; o, O; p, P; s, S; u, U; v, V; w, W; x, X; z, Z;$

Please take care to distinguish these capital letters by double underlining.

Final check:

- Names and complete professional addresses of all authors provided on title page?
- Summary enclosed?
- Short running title provided?
- If the paper is not in English, English title and English summary provided?
- Texts and ends of theorems, lemmas, etc., clearly marked?
- All figures enclosed?
- References listed according to the Instructions to Authors?
- Mathematics Subject Classification (MSC) numbers provided?

Plain TeX users:

- Request Pjour1 macropackage from: sv-serv@dhdspri6.bitnet.
- Submit disk with corresponding hard copy after acceptance of manuscript.
- Make sure disk and hard copy are identical.

Communications in Mathematical Physics

Copyright. Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA: Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. This fee is US \$ 0.20 per page per copy, plus a basic fee of US \$ 2.00 per article. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0010-3616, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Authors should mark manuscripts according to the "Instructions to Authors." They should be aware that manuscripts which are not properly marked require additional time for publication. Manuscripts should be sent to:

Prof. M. Aizenman, Department of Physics, Jadwin Hall, Princeton University, Princeton, NJ 08544, USA

Statistical physics

Prof. H. Araki, Research Institute for Mathematical Sciences, Kyoto University, Kyoto, 606, Japan

Mathematical methods with direct relevance to physics

Prof. A. Connes, I.H.E.S., F-91440 Bures-sur-Yvette, France

Relativity; geometry and physics

100 offprints of each article will be supplied to the author free of charge and additional copies may be obtained at cost price if ordered before the issue goes to press.

Subscription Information. Vols. 142–149, (3 issues each) will appear in 1992. **North America.** Recommended annual subscription rate: US \$ 2887.00, single issue price \$ 142.00 including carriage charges. Subscriptions are entered with prepayment only. Orders should be addressed to: Springer-Verlag New York Inc., Service Center Secaucus, 44 Hartz Way, Secaucus, NJ 07094, USA, Telephone (201) 348-4033, Telex 023 125 994, FAX (201) 348-45 05. Members of the International Association of Mathematical Physics (IAMP) are entitled to receive the journal strictly for their own personal use at a special reduced rate. The orders must be placed through the IAMP. **All Other Countries.** Recommended annual subscription rate: DM 4992.00, plus carriage charges: [Federal Republic of Germany: DM 66.77 incl. value added tax; all other countries: DM 103.20 except for the following countries to which SAL delivery (Surface Airmail Lifted) is mandatory: Japan DM 232.80, India DM 175.20, Australia/New Zealand DM 264.00. Airmail delivery to all other countries is available upon request. Volume price: DM 624.00, single issue price: DM 249.60 plus carriage charges. Orders for all countries except North America can either be placed with your bookseller or sent directly to: Springer-Verlag, Heidelberger Platz 3, 1000 Berlin 33. Tel. 0 30/82 07-1, Telex 01 83 319, FAX (0)30/821 4091. **Changes of Address:** Allow six weeks for all changes to become effective. All communications should include both old and new addresses (with Postal Codes) and should be accompanied by a mailing label from a recent issue. According to § 4 Sect. 3 of the German Postal Services Data Protection Regulations, if a subscriber's address changes the German Federal Post Office can inform the publisher of the new address even if the subscriber has not submitted a formal application for mail to be forwarded. Subscribers not in agreement with this procedure may send a written complaint to Springer-Verlag's Berlin office within 14 days of publication of this issue. **Back Volumes.** Prices are available on request. **Microform:** Microform editions are available from: University Microfilms International, 300 N. Zeeb Road, Ann Arbor, MI 48106, USA.

Production

Journal Production Department I, Springer-Verlag, Karin Quintes, Postfach 10 52 80, W-6900 Heidelberg, Federal Republic of Germany, Tel. 0 62 21/4 87-5 25, Telex 04 61 723, FAX (0)6221-487 624
