Partial Differential Equations

The introductory textbook

This text introduces of basic examples of partial differential equations, arising in continuum mechanics, electromagnetism, complex analysis and other areas, and develops a number of tools for their solution, including particularly Fourier analysis, distribution theory, and Sobolev spaces. These tools are applied to the treatment of basic problems in linear PDE including the Laplace equation, heat equation, and wave equation, as well as more general elliptic, parabolic, and hyperbolic equations. This book is also available in Hardcover as Volume 1 in the 3 volume set (below).

1996. Approx. 585 pages.
37 figures (Texts in Applied Mathematics, Vol. 23). Softcover DM 58,-
ISBN 0-387-94654-3

... and the comprehensive overview

Michael E. Taylor

Partial Differential Equations

I: Basic Theory

1996. Approx. 586 pages. 37 figures (Applied Mathematical Sciences, Vol. 115). Hardcover DM 98,- ISBN 0-387-94653-5

Contents: 1) Basic theory of ODE and vector fields; 2) The Laplace equation and wave equation; 3) Fourier analysis, distributions, and constant coefficient linear PDE; 4) Sobolev spaces; 5) Linear elliptic equations; 6) Linear evolution equations; Appendix A: Outline of functional analysis; Appendix B: Manifolds, vector bundles, and Lie groups.

II: Qualitative Studies of Linear Equations

1996. Approx. 545 pages. 13 figures (Applied Mathematical Sciences, Vol. 116). Hardcover DM 98,- ISBN 0-387-94651-9

Contents: 7) Pseudodifferential operators; 8) Spectral theory; 9) Scattering by obstacles; 10) Dirac operators and index theory; 11) Brownian motion and potential theory; 12) The partial Neumann problem; Appendix C: Connections and curvature.

III: Nonlinear Equations

1996. Approx. 650 pages. 65 figures (Applied Mathematical Sciences, Vol. 117). Hardcover DM 98,-
ISBN 0-387-94652-7

Contents: 13) Function space and operator theory for nonlinear analysis; 14) Nonlinear elliptic equations; 15) Nonlinear parabolic equations; 16) Nonlinear hyperbolic equations; 17) Euler and Navier-Stokes equations for incompressible fluids; 18) Einstein's equations

Springer

The instructions should be read carefully before preparing the manuscript

A. General

The author(s) transfer(s) the copyright to his/their article to Springer-Verlag effective if and when the article is accepted for publication. The copyright covers the exclusive and unlimited rights to reproduce and distribute the article in any form of reproduction (printing, electronic media or any other form); it also covers translation rights for all languages and countries. For U.S. authors the copyright is transferred to the extent transferable.

Manuscripts should be submitted in **duplicate**:

- (i) either to the **Editor** who, in the opinion of the author, is most closely concerned with the subject matter of the paper (this should be the rule);
- (ii) or to the **Chief Editor**.

Submission of diskettes is encouraged, but these should not be sent until any changes requested during the reviewing process have been entered and authors have been notified of acceptance for publication. Authors are requested to follow the instructions printed in the journal for preparation of diskettes.

Papers submitted for publication should preferably be written in **English**.

Authors who prepare their papers with T_EX are encouraged to ask for Springer-Verlag's T_EX macropackages, called P_Jour1g (plain-T_EX) and L_Jour1 (L^AT_EX), either by letter to Springer-Verlag or by e-mail to

svserv@vax.ntp.springer.de

– Springer-Verlag's e-mail server address. This message must contain one (several) of the following commands

for P_Jour1g: get /tex/plain/pjour1g.zip

for L_Jour1: get /tex/latex/ljour1.zip

After the manuscript has been accepted by the editor(s) the author must send in to the **Chief Editor** a disk containing the text in final form as well as any additional macro definitions used by the author, together with a printout for reference. It is important to ensure that the text is identical in the hard copy and in the soft copy. The production time for papers submitted in this form can be reduced considerably.

Authors who have written their papers in T_EX but have not, for whatever reasons, used Springer-Verlag's macros should likewise

send in a disk and corresponding hard copy. Springer-Verlag will then decide on a case-by-case basis whether it makes sense economically to work from the T_EX files.

To facilitate communication between the authors, editors and publisher, the author should furnish a **fax number** and/or **e-mail address** on the title page of the manuscript.

Each paper should be preceded by a **short abstract** in English.

Please submit one original manuscript typed on one side of the sheet only (in double spacing with wide margins) plus 2 copies photocopied on both sides to keep postage charges at a minimum. In order to reduce mailing costs, rejected manuscripts will not normally be returned (with the exception of original illustrations). Normally only printer's errors should be corrected in the proofs. A **charge** is made for **extensive changes** not due to typesetting errors, introduced at the proof stage.

Formulae should be printed or typed whenever possible. Dot matrix printer output is not accepted unless clearly legible.

Illustrations and diagrams should be submitted on separate sheets and not included in the text. They should be good quality and drawn in India ink using clean uniform lines. Computer-drawn figures are acceptable provided they are of comparable quality. Lines and curves must be smooth. Lettering 2 mm high is recommended. The publisher reserves the right to reduce or enlarge illustrations and diagrams. The author should indicate in the margin of the manuscript where illustrations and diagrams are to be inserted.

Footnotes, other than those referring to the title of the paper, should be avoided. If absolutely necessary, they should be numbered consecutively and placed at the foot of the page on which they occur (not at the end of the article).

On the first page of the manuscript a short **running title** should be provided (not to exceed 70 characters, including spaces).

The **list of references** at the end of the paper should always be in alphabetical order and include the names and initials of all authors, and years of publication (see examples below). Names of journal and book series should be ab-

breviated in accordance with the *Zentralblatt für Mathematik*. Whenever possible, please replace all references to papers accepted for publication, preprints or technical reports by the exact name of the journal, as well as the volume, first and last page numbers and year, if the article has already been published or accepted for publication.

When styling references, the following examples should be observed:

Journal article:

1. or [W] Woronowicz, S.L.: Operator equalities related to the Quantum E(2) group. *Commun. Math. Phys.* **144**, 417–428 (1992)

Complete book:

2. or [P–S] Pressley A., Segal, G.: Loop groups. Oxford: Clarendon Press 1986

Single contribution in a book:

3. or [M] Mack, G. Introduction to Conformal Invariant Quantum field theory in two or more dimensions. In: 't Hooft, G., Jaffe, A., Mack, G., Mitter, P., Stora, R. (eds.) *Nonperturbative quantum field theory*. Proceedings, Cargese 1987, pp. 353–383. New York, London: Plenum Press 1988

Citations in the text should be either (a) by numbers in square brackets, e.g., [1], or Bombieri and Giusti [1], referring to an alphabetically ordered and numbered list, or (b) by the author's initials in square brackets, e.g., [B–G], or (c) by author and year in parentheses, e.g., Bombieri and Giusti (1971). Any one of these styles is acceptable if used *consistently* throughout the paper. In the third system, if there are two authors, both should be named, e.g., Agar and Douglas (1955); if a work with more than two authors is cited, only the first author's name plus „et al.“ need be given; e.g., Komor et al. (1979); if there is more than one reference by the same author or team of authors in the same year, then a, b, c, etc. should be added after the year both in the text and in the list of references.

Thirty offprints are supplied free of charge. Additional offprints may be ordered by the authors at cost when proofs are returned.

B. Marking-up the manuscript

1. Text

The words “**Theorem**”, “**Lemma**”, “**Corollary**”, “**Proposition**”, „**Definition**“, etc. are

normally printed in **boldface**, followed by the formulation in *italics* (or, if italic script is not available, underlined with a single straight line) and with the end clearly indicated. The concept of the definition should be in boldface. The words “*Proof*”, “*Remark*”, “*Example*”, “*Note*”, etc. are printed in *italics* with the formulation in ordinary (roman) typeface. If any text in the manuscript is underlined and should be printed with this underlining, a remark explaining this must be attached.

2. Formulae

Letters in *formulae* are printed in *italics* and figures in roman if not marked otherwise. It will help the printer if in doubtful cases the position of indices and exponents is marked thus: h_{λ}^{ν} , a^{ψ} . Spacing of indices and exponents must be specially indicated ($A_m^{n,m}$) otherwise they will be set (A_{mn}).

The following are frequently confused and should be made unambiguous:

$\cup, U, u, \mathcal{U}; \circ, o, O, \mathcal{O}; \times, x, X, \chi, \kappa; \vee, v, \nu; \theta, \Theta, \phi, \varphi, \Phi, \emptyset, \varnothing; \psi, \Psi; \epsilon, \in;$

a', a' , the symbol a and the indefinite article a ; also handwritten letters:

$c, C; e, l; I, J; k, K; o, O; p, P; s, S; u, U; v, V; w, W; x, X; z, Z.$

Please take care to distinguish these capital letters by triple underlining.

Final check:

- Names and complete professional addresses of all authors provided on title page?
- Summary enclosed?
- Short running title provided?
- If the paper is not in English, English title and English summary provided?
- Texts and ends of theorems, lemmas, etc., clearly marked?
- All figures enclosed?
- References listed according to the Instructions to Authors?

T_EX users:

- Request PJour l g or LJour l macropackage from:
svserv@vax.ntp.springer.de
- Submit disk with corresponding hard copy after acceptance of manuscript
- Make sure disk and hard copy are identical

Authors should mark manuscripts according to the „Instructions for Authors“. They should be aware that manuscripts which are not properly marked require additional time for publication. Manuscripts should be sent to:

Springer L^AT_EX and plain-T_EX macros

We can use your T_EX files directly for phototypesetting if you have used our macros. Makropackages are available for the following journals:

L_Jour1 L^AT_EX styles for Acta Informatica, Applicable Algebra in Engineering, Communication and Computing, Archive for Mathematical Logic, Astronomy & Astrophysics Reviews, Calculus of Variations, Communications in Mathematical Physics, Continuum Mechanics and Thermodynamics, Economic Theory, Inventiones mathematicae, Journal of Evolutionary Economics, Journal of Mathematical Biology, Manuscripta mathematica, Mathematische Annalen, Mathematische Semesterberichte, Mathematische Zeitschrift, Numerische Mathematik, Probability Theory and Related Fields, Statistical papers, Theoretica Chimica Acta

P_Jour1g global plain T_EX packages for all journals mentioned above; **P_Jour 1** may also still be used. All packages are available via mailserver, FTP server or on DOS diskettes.

Mailserver

Send an e-mail message to svserv@vax.ntp.springer.de which must contain one (several) of the following commands:

L_Jour1 `get /tex/latex/ljour1.zip`
P_Jour1g `get /tex/plain/pjour1g.zip`

In order to be transmitted ungarbled via the net, the files are pkzipped and unencoded. The line `get /tex/help-tex.txt` in your e-mail to `svserv` will send you a file explaining how to unpack the files you receive. Please do not send regular e-mail to this address.

FTP server

The internet address is 192.129.24.12 (`trick.ntp.springer.de`) The username is `FTP` or `ANONYMOUS` and the files are in the directory `/pub/tex`

Diskettes

To get the macro files and the AMS fonts (when needed) on 3.5" DOS diskettes please write to:

Springer-Verlag, Journal Production,
Tiergartenstr. 17
D-69121 Heidelberg, Germany
e-mail: springer@vax.ntp.springer.de
FAX number: x 49 6221 487625

Please indicate clearly which macro package you need and the journal for which your paper is intended.

Use our L^AT_EX and plain-T_EX macros to prepare your article for this and for other Springer journals.
