

# DIFFERENTIAL AND INTEGRAL EQUATIONS

Volume 24, Numbers 5-6

May/June 2011

---

|                                                                                                                                                                                           |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Alex Meril, Gisèle M. Mophou, and Gaston M. N'Guérékata,</b> Asymptotic behavior of bounded mild solutions of some functional differential and fractional differential equations ..... | 401 |
| <b>Nakao Hayashi, Chunhua Li, and Pavel I. Naumkin,</b> On a system of nonlinear Schrödinger equations in 2d .....                                                                        | 417 |
| <b>S.P. Hastings and J.B. Mcleod,</b> Short proofs of results by Landesman, Lazer, and Leach on problems related to resonance .....                                                       | 435 |
| <b>Xin Yu,</b> Generalized Strichartz estimates on perturbed wave equation and applications on Strauss conjecture .....                                                                   | 443 |
| <b>Ionuț Munteanu,</b> Tangential feedback stabilization of periodic flows in a 2-D channel .....                                                                                         | 469 |
| <b>Vittorio Martino,</b> A symmetry result on Reinhardt domains .....                                                                                                                     | 495 |
| <b>Nicolas Godet,</b> Blow up in several points for the nonlinear Schrödinger equation on a bounded domain .....                                                                          | 505 |
| <b>Makoto Nakamura,</b> Remarks on Keel-Smith-Sogge estimates and some applications to nonlinear higher order wave equations .....                                                        | 519 |
| <b>X. Carvajal, M. Panthee, and M. Scialom,</b> On the critical KdV equation with time-oscillating nonlinearity .....                                                                     | 541 |
| <b>Takashi Narazaki,</b> Global solutions to the Cauchy problem for a system of damped wave equations .....                                                                               | 569 |
