

# DIFFERENTIAL AND INTEGRAL EQUATIONS

Volume 31, Numbers 7-8

July/August 2018

---

<b>Uriel Kaufmann and Humberto Ramos Quoirin,</b> Positive solutions of indefinite semipositone problems via sub-super solutions .....	497
<b>Timothy Candy and Hans Lindblad,</b> Long range scattering for the cubic Dirac equation on $\mathbb{R}^{1+1}$ .....	507
<b>E.M. Bonotto, J. Costa Ferreira, and M. Federson,</b> Uniform asymptotic stability of a discontinuous predator-prey model under control via non-autonomous systems theory .....	519
<b>Pan Zheng, Chunlai Mu, and Yongsheng Mi,</b> Global stability in a two-competing-species chemotaxis system with two chemicals .....	547
<b>Loïc Bourdin,</b> Cauchy-Lipschitz theory for fractional multi-order dynamics – State-transition matrices, Duhamel formulas and duality theorems .....	559
<b>Luisa Faella, Sara Monsurrò, and Carmen Perugia,</b> Homogenization of imperfect transmission problems: the case of weakly converging data .....	595
<b>Josef Diblík, Marek Galewski, Marcin Koniorczyk, and Ewa Schmeidel,</b> An application of a diffeomorphism theorem to Volterra integral operator	621
<b>Maya Chhetri, Lakshmi Sankar, R. Shivaji, and Byungjae Son,</b> An existence result for superlinear semipositone $p$ -Laplacian systems on the exterior of a ball .....	643
