

CONTENTS

|  | PAGE |
|--|------|
| F. A. M. ALDOSRAY and I. STEWART: Ascending chain conditions on special classes of ideals of Lie algebras .....                                    | 1    |
| Y. SAWABE: Legendre character sums .....   | 15   |
| Y. KAMIYAMA: Topology of moduli space of certain $SU(2)$ connections of degree 2 over $S^4$ .....  | 23   |
| L. BARCHINI and F. L. WILLIAMS: Periodic zeta functions for rank 1 space forms of symmetric spaces .....   | 33   |
| M. EGUCHI and S. TANAKA: The explicit representation of the determinant of Harish-Chandra's $C$ -function in $SL(3, R)$ and $SL(4, R)$ cases ..... | 57   |
| V. Lj. KOCIC and G. LADAS: Linearized oscillations for difference equations .....  | 95   |
| N. A. WATSON: Cofine boundary behaviour of temperatures .....  | 103  |
| X. WU and J. RUAN: Asymptotic behavior of a biological model with time delays .....  | 115  |
| P. RIBENBOIM, F.R.S.C.: Infinite families of non-principal prime ideals .....  | 125  |
| H. OHMORI: Classification of weighing matrices of small orders .....   | 129  |
| R. NISHII: Saddlepoint approximation for the distribution function of the mean of random variables .....   | 177  |
| S. EGUCHI: The projection method for accelerated life test model in bivariate exponential distributions .....                                      | 185  |
| T. YOKOYAMA and Y. FUJIKOSHI: Tests for random-effects covariance structures in the growth curve model with covariates .....                       | 195  |
| Á. ELBERT and T. KUSANO: On the differential equation $y'' + p(t) y'  \operatorname{sgn} y + q(t)y = 0$ .....                                      | 203  |
