Submitting manuscripts

Original research papers in pure and applied mathematics intended for publication in this journal may be written in English, French or German. The submission of a paper implies the author's assurance that it has not been published or submitted for publication elsewhere.

Submit two copies of your manuscript, double spaced, to the Illinois Journal of Mathematics, 1409 West Green St., University of Illinois, Urbana, Illinois 61801 (ijm@math.uiuc.edu) or directly to one of the editors listed on the inside front cover.

Include your e-mail address with your covering letter.

Sending electronic files

Once your paper is accepted you will be given instructions for sending your electronic file, to be used in the typesetting process. But do not send any electronic files until then. We prefer a version of TEX but can use any electronic files, including ChiWriter, T^3, WordPerfect and Microsoft Word.

Proof

Authors will receive only galley proof. Proof sent to North American addresses will be accompanied by manuscript and sent by first class mail. To other addresses, proof will be sent by airmail, and manuscript will be sent only if requested. Authors are asked to return proof (and manuscript if sent) by the same class of mail that was used in sending it to them.

Page charges

To cover a part of the cost of production, the author's institution will be billed for $40 per page.

Offprints

One hundred offprints are supplied to the sole author of a paper; fifty free offprints are supplied to each author of a joint paper. Additional offprints may be purchased.

Vol. 42, No. 1 CONTENTS Spring 1998

Page

Discretization of linear operators on $L^p(\mathbb{R}^N)$
By MARIA J. CARRO 1

Eigenvalues of Laplacians with mixed boundary conditions, under conformal mapping
By RICHARD SNYDER LAUGESEN 19

The near Radon-Nikodym property in Lebesgue-Bochner function spaces
By NARCISSE RANDRIANANTOANINA and ELIAS SAAB 40

Cauchy transforms and composition operators
By JOSEPH A. CIMA and ALEC MATHESON 58

Model theory of profinite groups having the Iwasawa property
By ZOÉ CHATZIDAKIS 70

On Chen's basic equality
By MARCOS DAJCZER and LUIS A. FLORIT 97

Nest Algebras are Hyperfinite
By KENNETH R. DAVIDSON 107

Continuity and analyticity of families of self-adjoint Dirac operators on a manifold with boundary
By P. KIRK and E. KLASSEN 123

Perturbation of plane curves and sequences of integers
By MÁTÉ WIERDL 139

Variation in probability, ergodic theory and analysis
By MUSTAFA A. AKCOGLU, ROGER L. JONES and PETER O. SCHWARTZ.. 154

Published by the University of Illinois Press on behalf of the Department of Mathematics of the University of Illinois in Spring, Summer, Fall, and Winter. Supported in part by the George A. Miller Endowment.
