Submitting manuscripts

Original research papers in pure and applied mathematics intended for publication in this journal may be written in English, French or German. The submission of a paper implies the author's assurance that it has not been published or submitted for publication elsewhere.

Submit two copies of your manuscript, double spaced, to the Illinois Journal of Mathematics, 1409 West Green St., University of Illinois, Urbana, Illinois 61801 (ijm@math.uiuc.edu) or directly to one of the editors listed on the inside front cover.

Include your e-mail address with your covering letter.

Sending electronic files

Once your paper is accepted you will be given instructions for sending your electronic file, to be used in the typesetting process. But do not send any electronic files until then. We prefer a version of TEX but can use any electronic files, including ChiWriter, T^3, WordPerfect and Microsoft Word.

Proof

Authors will receive only galley proof. Proof sent to North American addresses will be accompanied by manuscript and sent by first class mail. To other addresses, proof will be sent by airmail, and manuscript will be sent only if requested. Authors are asked to return proof (and manuscript if sent) by the same class of mail that was used in sending it to them.

Page charges

To cover a part of the cost of production, the author's institution will be billed for $40 per page.

Offprints

One hundred offprints are supplied to the sole author of a paper; fifty free offprints are supplied to each author of a joint paper. Additional offprints may be purchased.

Vol. 40, No. 4 CONTENTS Winter 1996

Page

Norm inequalities in the Corach-Porta-Recht theory and operator means
By MASATOSHI FUJII, TAKAYUKI FURUTA AND RITSUO NAKAMOTO 527

Norm inequalities for vector valued random series
By YORAM SAGHER AND NIANDI XIANG 535

Conformal motion of contact manifolds with characteristic vector field in the k-nullity distribution
By RAMESH SHARMA AND DAVID E. BLAIR 553

Deformation classes of graded modules and maximal Betti numbers
By KEITH PARDUE 564

A Hecke correspondence theorem for modular integrals with rational period functions
By WENDELL CULP-RESSLER 586

On the $L^{N/2}$-norm of scalar curvature
By MAN CHUN LEUNG 606

Hankel operators on complex ellipsoids
By F. SYMESAK 632

On an integral operator and its spectrum
By JOAQUIN BUSTOZ, MOURAD E. H. ISMAIL AND JIFENG MA 648

Composition operators on small weighted Hardy spaces
By BARBARA D. MACCLUER, XIANGFEI ZENG AND NINA ZORBOSKA ... 662

Orthogonal martingales under differential subordination and applications to Riesz transforms
By RODRIGO BAÑUELOS AND GANG WANG 678

Globalizing estimates for the periodic KPI equations
By JAMES COLLIANDER 692

Published by the University of Illinois Press on behalf of the Department of Mathematics of the University of Illinois in Spring, Summer, Fall, and Winter. Supported in part by the George A. Miller Endowment.
