

	Page
Some operator inequalities concerning generalized inverses By P. J. MAHER	503
Non coherence de certains anneaux de fonctions holomorphes Par M. HICKEL	515
A simultaneous almost everywhere central limit theorem for diffusions and its application to path energy and eigenvalues of the Laplacian By GUNNAR A. BROSAMLER	526
The McShane integral of Banach-valued functions By RUSSELL A. GORDON	557
On the modulus of absolute continuity of holomorphic functions in the ball By PATRICK AHERN and JOAQUIM BRUNA	568
The embedding of Banach spaces into spaces with structure By M. ZIPPIN	586
A non-linear method for constructing certain basic sequences in Banach spaces By N. GHOUSSOUB and B. MAUREY	607
The L^p -conjecture and Young's inequality By SADAHIRO SAEKI	614
Homotopy characteristic classes of foliations By S. HURDER and D. LEHMANN	628
Boundary localization of the normal family of holomorphic mappings and remarks on existence of bounded holomorphic functions on complex manifolds By E. B. LIN and B. WONG	656
Interpolation sets for Lipschitz functions on curves of the unit sphere By CARME CASCANTE	665
