

Illinois Journal of Mathematics

Volume 63 | Number 3 | October 2019

- 353 **Maximal displacement and population growth for branching
Brownian motions**
Yuichi Shiozawa
- 403 **Angular derivatives and semigroups of holomorphic functions**
Nikolaos Karamanlis
- 425 **Borcea–Voisin mirror symmetry for Landau–Ginzburg models**
Amanda Francis, Nathan Priddis, and Andrew Schaug
- 463 **Correction and notes to the paper “A classification of Artin–Schreier
defect extensions and characterizations of defectless fields”**
Franz-Viktor Kuhlmann
- 469 **Distance sets over arbitrary finite fields**
Doowon Koh, Sujin Lee, Thang Pham, and Chun-Yen Shen
