INDEX

F. Almgren & J. E. Taylor, *Flat flow is motion by crystalline curvature for curves whith crystalline energies* 1

R.-T.Dong, *A Bernstein type of inequality for eigenfunctions* 23

L. Ein, O. Küchle & R. Lazarsfeld, *Local positivity of ample line bundles* 193

P. M. N. Feehan, *Geometry of the ends of the moduli space of anti-self-dual connections* 465

R. Feres, *Actions of discrete linear groups and Zimmer's conjecture* 554

R. Fintushel & R. J. Stern, *Donaldson invariants of 4-manifolds with simple type* 577

N. J. Hitchin, *Twistor spaces, Einstein metrics and isomonodromic deformations* 30

G. R. Jensen & R. Liao, *Families of flat minimal tori in* $\mathbf{C}P^2$ 113

M. Kapovich & J. Millson, *On the moduli space of polygons in the Euclidean plane* 133

_____, *Supplements to "On the moduli space of polygons in the Euclidean plane"* 430

O. Küchle, *See* L. Ein, O. Küchle & R. Lazarsfeld 193

R. Lazarsfeld, *See* L. Ein, O. Küchle & R. Lazarsfeld 193

D. Lehmann & T. Suwa, *Residues of holomorphic vector fields relative to singular invariant subvarieties* 165

R. Liao, *See* G. R. Jensen & R. Liao 113

F. Luo, *Möbius structures on Seifert manifolds.* I 634

K. M. Luttinger, *Lagrangian tori in* R^4 220

J. Millson, *See* M. Kapovich & J. Millson 133

_____, *See* M. Kapovich & J. Millson 430

S. Müller & V. Šverák, *On surfaces of finite total curvature* 229

Y. Ruan & G. Tian, *A mathematical theory of quantum cohomology* 259

R. J. Stern, *See* R. Fintushel & R. J. Stern 577

T. Suwa, *See* D. Lehmann & T. Suwa 165

V. Šverák, *See* S. Müller & V. Šverák 229

L.-F. Tam & T. Y. H. Wan, *Quasi-conformal harmonic diffeomorphisms and the universal Teichmüller space* 368

J. E. Taylor, *See* F. Almgren & J. E. Taylor 1

C.-L. Terng & G. Thorbergsson, *Submanifold geometry in symmetric spaces* 665

G. Thorbergsson, *See* C.-L. Terng & G. Thorbergsson 665

G. Tian, *See* Y. Ruan & G. Tian 259

L. Traynor, *Supplement to "Sympletic packing constructions"* 411

T. Y. H. Wan, *See* L.-F. Tam & T. Y. H. Wan 368

INFORMATION FOR AUTHORS

Manuscripts

Manuscripts for publication should be sent to Vesselina Panteva, Department of Mathematics, Harvard University, Massachusetts, 02138, U.S.A. A separate cover letter should note if the paper is available as an electronic manuscript, and if so, in which format. Please provide your e-mail address if available.

Manuscripts should be written in English, French, German, or Italian, and should be typewritten, double spaced, with generous margins. Diagrams should be drawn with black India ink on glossy white paper.

To eliminate unnecessary delay or difficulties in printing, authors may be guided by the article *Manual for authors of mathematical papers*, Bull. Amer. Math. Soc. **68** (1962) 429-444.

Footnotes, exept a possible acknowledgement of assistence or financial support on the first page, should be avioded by being incorporated into the text, perhaps parenthetically.

The list of references must be in alphabetical-chronological order; abbreviations of names of journals and references to books should follow the standard form established by Mathematical Reviews. The following references are typical examples:

[1] E. Cartan, *La géométrie des groups de transformations*, J. Math. Pures Appl. **6** (1927) 1-119.

[2] O. Veblen & J. H. C. Whitehead, *The foundation of differential geometry*, Cambridge Tracts No. 29, Cambridge University Press, Cambridge, 1932.

Proofs

Authors receive only one set of proofs for corrections and will be responsible for the expence of making excessive alternations of the original manuscripts during the proofreading.

Offprints

One hundred offprints are supplied free for each article. In the case of multiple authors, the 100 free offprints will be divided equally among the authors. Additional offprints may be purchased at a reasonable cost.

Electronically Prepared Manuscripts

The Editors of the *Journal of Differential Geometry* encourage submission of electronically prepared manuscripts in $\mathcal{A}\mathcal{M}\mathcal{S}$-TEX or $\mathcal{A}\mathcal{M}\mathcal{S}$-LATEX because properly prepared electronic manuscripts save the author proofreading time and move more quickly through the production process.

Electronic manuscripts may be requested (if available) after a paper has been submitted.
