

CONTENTS

Controllability of fractional integrodifferential equations
with state-dependent delay
By KHALIDA AISSANI AND MOUFFAK BENCHOHRA 149

Solvability of a volume integral equation formulation for
anisotropic elastodynamic scattering
By MARC BONNET 169

Compositions of pseudo almost automorphic functions via
measure theory and applications
By ZHENBIN FAN, QIXIANG DONG AND GANG LI 205

Approximate solution of Urysohn integral equations with
non-smooth kernels
By REKHA P. KULKARNI AND T.J. NIDHIN 221

A collocation method solving integral equation models for
image restoration
By YUZHEN LIU, LIXIN SHEN, YUESHENG XU
AND HONGQI YANG 263
