

CONTENTS

Satoshi NAITO , On regular subalgebras of Kac-Moody algebras and their associated invariant forms —Symmetrizable case—	157
Gabor TOTH , Mappings of moduli spaces for harmonic eigenmaps and minimal immersions between spheres	179
Masaharu KOUNO, Kimihiko MOTEGI and Tetsuo SHIBUYA , Twisting and knot types	199
Nariya KAWAZUMI , The invariant differential forms on the Teichmüller space under the Fenchel-Nielsen flows	217
Toshiro WATANABE , On unimodal Lévy processes on the nonnegative integers	239
Ichiro SHIGEKAWA and Nobuo YOSHIDA , Littlewood-Paley-Stein inequality for a symmetric diffusion	251
Matsuyo TOMISAKI , Homogenization of cadlag processes	281
Hideo KOZONO and Hermann SOHR , Density properties for solenoidal vector fields, with applications to the Navier-Stokes equations in exterior domains	307
Angelo FAVINI and Atsushi YAGI , Space and time regularity for degenerate evolution equations	331
