

## CONTENTS

<b>Robert E. GREENE and Katsuhiko SHIOHAMA</b> , The isometry groups of manifolds admitting nonconstant convex functions .....	1
<b>Tokuzo SHIGA</b> , A certain class of infinite dimensional diffusion processes arising in population genetics .....	17
<b>Mutsumi AMASAKI</b> , Cohen-Macaulay normal local domains whose associated graded rings have no depth .....	27
<b>Yumiko SATO</b> , A linear prediction problem for symmetric $\alpha$ -stable processes with $1/2 < \alpha < 1$ .....	33
<b>Izumi KURIBAYASHI</b> , On automorphism groups of a curve as linear groups .....	51
<b>Hiroshi AKIYAMA</b> , On Itô's formula for certain fields of geometric objects .....	79
<b>Herbert AMANN</b> , On abstract parabolic fundamental solutions .....	93
<b>Kazuhiko FUKUI</b> , Stability of foliations of 3-manifolds by circles .....	117
<b>Jiro SEKIGUCHI</b> , Remarks on real nilpotent orbits of a symmetric pair .....	127
<b>Takashi NITTA and Masaru TAKEUCHI</b> , Contact structures on twistor spaces .....	139
<b>Akira KANEKO</b> , A sharp sufficient geometric condition for the existence of global real analytic solutions on a bounded domain .....	163
