

CONTENTS

Takeshi KAWAZOE , Fourier transform of L^p on real rank 1 semisimple Lie groups	561
Syoshi TOKUNAGA and Masaaki YOSHIDA , Complex crystallographic groups I ..	581
Jyoichi KANEKO, Syoshi TOKUNAGA and Masaaki YOSHIDA , Complex crystallographic groups II	595
Isao WAKABAYASHI , Nonexistence of bounded functions on the homology covering surface of P^1 -3 points	607
Takahiko NAKAZI , Invariant subspaces of unitary operators	627
T. T. MOH , On two fundamental theorems for the concept of approximate roots	637
Midori S. GOTO , On isometry groups of a manifold without focal points	653
Osamu KOBAYASHI , A differential equation arising from scalar curvature function	665
Noboru OKAZAWA , On the perturbation of linear operators in Banach and Hilbert spaces	677
James K. DEVENEY and John N. MORDESON , Transcendence bases for field extensions	703
Takao FUJITA , Theorems of Bertini type for certain types of polarized manifolds	709
Kozo SUGANO , A characterization of Azumaya coalgebras over a commutative ring	719
