

CONTENTS

Akira KANEKO , On the singular spectrum of boundary values of real analytic solutions	385
Hitoshi KUMANO-GO , Fundamental solutions for operators of regularly hyperbolic type	399
Kusuo KOBAYASHI, Tunekiti SIRAO and Hiroshi TANAKA , On the growing up problem for semilinear heat equations	407
Noriaki KAWANAKA , On the irreducible characters of the finite unitary groups	425
Silvio MACHADO and Joao B. PROLLA , Concerning the bounded case of the Bernstein-Nachbin approximation problem	451
Mitsuhiro TAKEUCHI , Groups of algebras over $A \otimes \bar{A}$	459
Yosio MUTO , Riemannian submersions and critical Riemannian metrics	493
Toshio NISHIMURA and Takemasa OHYA , The formal system for various 3-valued logics II	513
Hironori SHIGA , On the automorphism of C^2 with invariant axes	529
B. WEGNER , Analytic approximation of continuous ovals of constant width	537
Takaši KUSANO and Hiroshi ONOSE , Nonlinear oscillation of second order functional differential equations with advanced argument	541
Yoshio KIMURA , The nullity of compact Kähler submanifolds in a complex projective space	561
Hirohiko SHIMA , Symmetric spaces with invariant locally Hessian structures	581
