

- 267    **Multiplication of periodic hyperfunctions via harmonic regularization and applications**  
V. Valmorin
- 293    **Projective unitary representations of infinite-dimensional Lie groups**  
Bas Janssens and Karl-Hermann Neeb
- 343    **Extending properties to relatively hyperbolic groups**  
Daniel A. Ramras and Bobby W. Ramsey
- 357    **Two applications of strong hyperbolicity**  
Bogdan Nica
- 367    **Constructing MASAs with prescribed properties**  
Sorin Popa
- 399    **Uniform K-stability and plt blowups of log Fano pairs**  
Kento Fujita
- 419    **On  $n$ -dimensional fractional Hardy operators and commutators in variable Herz-type spaces**  
Liwei Wang, Meng Qu, and Wenyu Tao
- 441    **On some spectral properties of the weighted  $\bar{\partial}$ -Neumann operator**  
Franz Berger and Friedrich Haslinger
- 455    **Angehrn–Siu type effective basepoint freeness for quasi-log canonical pairs**  
Haidong Liu
- 471    **The notion of cusp forms for a class of reductive symmetric spaces of split rank 1**  
Erik P. van den Ban, Job J. Kuit, and Henrik Schlichtkrull
