CONTENTS

Vol. 21, No. 2, June 1969

MITSURU OZAWA, An elementary proof of the Bieberbach conjecture for the sixth coefficient. 129
YATSUKA NAKAMURA, Measure-theoretic construction for information theory. 133
YOSIO MUTŌ, On infinitesimal deformations of closed hypersurfaces. 151
GERALD D. LUDDEN, Submanifolds of manifolds with an f-structure. 160
KENTARO YANO, Generalizations of the connection of Tzitzéica. 167
HISASHI CHODA, YŌICHI KIJIMA AND YOSHIOMI NAKAGAMI, Some extremal properties in the unit ball of von Neumann algebras. 175
KIYOSHI NIINO, On the family of analytic mappings between two ultrahyperelliptic surfaces. 182
HIDEO MUTŌ, On analytic mappings among algebroid surfaces. 191
HISAO MIZUMOTO, Periods of differentials and relative extremal length, I. ... 205
MAKOTO SAKAI, On constants in extremal problems of analytic functions. ... 223
SAMUEL I. GOLDBERG, On conformally flat spaces with definite Ricci curvature. 226
TOMINOSUKE ŌTSUKI, A note on pseudo-umbilical submanifolds with M-index 1 and codimension 2 in Euclidean spaces. 233
NOBUYUKI SUITA, On continuity of extremal distance and its applications to conformal mappings. 236
KOICHI OGIUE, Complex submanifolds of the complex projective space with second fundamental form of constant length. 252
