INDEX

VOLUME 27, 1980

	Page
Roger W. Barnard and Charles Kellogg	
Applications of convolution operators to problems in univalent function theory	81
Eric Bedford	
An example of a plurisubharmonic measure on the unit ball in \mathbb{C}^2	365
Joan S. Birman and José María Montesinos	
On minimal Heegaard splittings	47
Douglas M. Campbell	
A truly isolated univalent function	253
P. T. Church and J. G. Timourian	
Deficient points of maps on manifolds.	321
Bruce N. Cooperstein	
Nearly maximal representations for the special linear group	3
J. L. Denny	
The support of discrete extremal measures with given marginals	59
Frederick P. Gardiner	
Three-holed spheres and Riemann surfaces.	117
Sarah J. Gottlieb	
Fixed points of automorphisms of linear groups	131
A. Gylys, see A. Naftalevich, page 195	
Andrew N. Harrington	
Some extremal problems in conformal and quasiconformal mapping.	95
W. K. Hayman	
The logarithmic derivative of multivalent functions	149
W. K. Hayman and B. Korenblum	
A critical growth rate for functions regular in a disk	21
James L. Heitsch	
A residue formula for holomorphic foliations	181
David L. Johnson	
Sectional curvature and curvature normal forms	275

INDEX

	Page
Peter W. Jones Bounded holomorphic functions with all level sets of infinite length.	75
Charles Kellogg, see Roger W. Barnard, page 81	
George Kempf Some quotient surfaces are smooth	295
Paik Kee Kim and Jeffrey L. Tollefson Splitting the PL involutions of nonprime 3-manifolds	259
B. Korenblum, see W. K. Hayman, page 21	
Peter Lappan and Lee Rubel Some orderings induced by spaces of analytic functions.	371
Tekla Lewin On roots in free groups	31
Herbert C. Lyon Torus knots in the complements of links and surfaces.	39
Benjamin M. Mann and Edward Y. Miller The construction of the Kervaire sphere by means of an involution	301
Edward Y. Miller, see Benjamin M. Mann, page 301	
José María Montesinos, see Joan S. Birman, page 47	
A. Naftalevich and A. Gylys On meromorphic solutions of a linear differential-difference equation with constant coefficients.	195
Daniel M. Oberlin A Rudin-Carleson theorem for uniformly convergent Taylor series.	309
Lee Rubel, see Peter Lappan, page 371	
Leonard R. Rubin Hereditarily strongly infinite dimensional spaces	65
Walter Rudin Some representing measures for the ball algebra	315
Russell J. Rowlett Bordism of metacyclic group actions.	223
David C. Royster Stabilizations of periodic maps on manifolds	235

INDEX

	Page
Joel H. Shapiro	Cauchy transforms and Beurling-Carleson-Hayman thin sets 339
David A. Stegenga	A geometric condition which implies BMOA 247
J. G. Timourian,	see P. T. Church, page 321
Jeffrey L. Tollefson,	see Paik Kee Kim, page 259
J. L. Ullman	Orthogonal polynomials associated with an infinite interval. 353
John J. Walsh	A class of spaces with infinite cohomological dimension 215
