

CONTENTS

	PAGE
Analytic functions of finite valence, with applications to Toeplitz operators <i>Kenneth Stephenson</i>	5
On the radial limits of functions with Hadamard gaps <i>D. Gnuschke and Ch. Pommerenke</i>	21
A univalence criterion <i>J. M. Anderson and A. Hinkkanen</i>	33
The variation of holomorphic functions on tangential boundary curves <i>Walter Rudin</i>	41
Transcendental transcendence of solutions of Schröder's equation associated with finite Blaschke products <i>F. W. Carroll</i>	47
On certain analytic (Nevanlinna) functions <i>Maxwell O. Reade and Pavel G. Todorov</i>	59
Univalent multipliers of the Dirichlet space <i>Sheldon Axler and Allen L. Shields</i>	65
Random series and bounded mean oscillation <i>Peter Duren</i>	81
Smoothness of inverse Laplace transforms of functions univalent in a half-plane <i>Albert Baernstein II</i>	87
Quasiconformal analogues of theorems of Koebe and Hardy–Littlewood <i>K. Astala and F. W. Gehring</i>	99
On the frequency of multiple values of a meromorphic function of small order <i>Daniel F. Shea</i>	109
On quasiconvex functions <i>W. K. Hayman</i>	117
