NOTRE DAME JOURNAL OF FORMAL LOGIC

Editors:

Michael Detlefsen
Kit Fine
Mark E. Nadel
Howard K. Wettstein

Consulting Editors:

Elliott Mendelson
V. Frederick Rickey
Alan Rose
Paul Young

Associate Editors:

Ernest LePore
Penelope Maddy

Business Manager:

Michele Daugherty

VOLUME 26, NUMBER 2, APRIL 1985

CONTENTS

- Recursively saturated models generated by indiscernibles.
By *James H. Schmerl* 99
- From preference to utility: A problem of descriptive set theory.
By *John P. Burgess* 106
- The decision problem for linear temporal logic.
By *John P. Burgess and Yuri Gurevich* 115
- Stationary logic and its friends—I.
By *Alan H. Mekler and Saharon Shelah* 129
- An exposition of Shelah's 'main gap': Counting uncountable
models of ω -stable and superstable theories.
By *L. Harrington and M. Makkai* 139
- Some exact equiconsistency results in set theory.
By *Leo Harrington and Saharon Shelah* 178

Notre Dame Journal of Formal Logic is published quarterly by the University of Notre Dame in January, April, July, and October of each year. The Journal is composed by Beljan, Ltd., Dexter, Michigan and printed by Cushing-Malloy, Inc., Ann Arbor, Michigan. Second-class postage paid at Notre Dame, Indiana 46556.

Subscriptions are \$40.00 per year for institutions and \$20.00 for individuals. Back volumes are \$20.00 each for Volumes 1–10 and \$35.00 each for Volumes 11–25. Orders for subscriptions and back volumes (accompanied by payment) and changes of address should be sent to the *Business Manager*, P.O. Box 5, Notre Dame, Indiana 46556, U.S.A.

Notre Dame Journal of Formal Logic (ISSN 0029-4527)

The contents of this and the next issue of the *Notre Dame Journal of Formal Logic* consist of a portion of the Proceedings of the 1980–81 Logic Year at the Institute for Advanced Studies of the Hebrew University of Jerusalem.

Another portion of those proceedings has already appeared in the *Annals of Pure and Applied Logic*, vol. 26, no. 2 (1984). The remainder will appear in a forthcoming issue of the *Israel Journal of Mathematics*.

We wish to thank Professor J. Makowsky for his role in the publication of these articles.
