

AUTHOR INDEX

VOLUMES I—X (1960—1969)

JOHN THOMAS CANTY and ANN W. LAUER

This author index gives a complete listing of all articles published in *Notre Dame Journal of Formal Logic*, Volumes I—X (1960—1969). The index is arranged alphabetically by surname of authors. All articles by a given author are listed under his name in chronological order by date of publication. Articles with multiple authorship are listed under the name of each author.

The index lists over four hundred articles from one hundred and seventy five authors including: M. Anderson, I. Angelelli, F. Asenjo, E. Ashworth, J. Bacon, A. Barker, J. Barback, R. Beatty, N. Belnap, Jr., O. Bird, S. Bloom, I. Bocheński, I. Boh, D. Bollman, K. de Bouvère, C. Bredlau, D. Brignole, G. Brumm, R. Bull, T. Bynum, P. Calabrese, J. Canty, R. Carnes, A. Carpentier, C. Caton, H. Chandler, C. Cheng, L. Chiaraviglio, R. Clay, N. Cocchiarella, R. Cole, F. Coppotelli, J. Corcoran, M. Cresswell, F. Crosson, R. Doss, S. Dowdy, B. Dreben, R. Eberle, H. Enderton, T. Evans, G. Farre, H. Fast, M. Fisk, E. Foxley, W. Frascella, M. Gemignani, L. Goddard, G. Goe, A. Goetz, R. Goodstein, T. Grilliot, E. Hacker, N. Hanson, I. Heath, D. Henry, H. Hermes, A. Heyting, J. Hooley, A. Ihrig, W. Jaffe, Z. Jordan, G. Kalinowski, D. Kaplan, J. Kearns, M. Krom, G. Küng, F. von Kutshera, K. Lambert, L. Larouche, A. Lauer, H. Leblanc, R. Lee, C. Leininger, C. Lejewski, E. Lemmon, S. Liu, K. Loewen, C. Lyngholm, J. Mackie, J. Markham, G. Massey, S. McCall, S. McCleary, C. McKay, T. McLaughlin, E. Mendelson, K. Menger, C. Meredith, F. Mihăilescu, J. Minichiello, R. Montague, A. Moreno, A. Mullin, J. Myhill, W. Nemitz, H. Nielsen, W. O'Briant, K. Ohashi, W. Parry, C. Parsons, M. Partis, T. Patton, P. Perkins, R. Peters, H. Pogorzelski, A. Prior, R. Purtil, H. Putnam, A. Raggio, G. Rainich, J. Reichbach, M. Rennie, N. Rescher, M. Resnik, T. Ristea, F. Rivetti Barbò, J. Rosenberg, R. Routley, H. Rubin, J. Rubin, S. Saito, L. Sanchis, K. Sayre, T. Scharle, R. Schock, M. Schultz, G. Schumm, S. Sehgal, J. Seldin, A. Shukla, Sibajiban, W. Sierpiński, J. Sikora, L. Simons, W. Singletary, V. Sinisi, F. Sioson, H. Skala, T. Skolem, T. Smiley, B. Sobociński, C. de Renna e Souza, W. Stegmüller, H. Stopes-Roe, P. Strauss, S. Summersbee, R. Suszko, A. Sweet, D. Székely, I. Thomas, R. Thomason, R. Tompkins, J. Trentman, A. Trew, R. Tursman, F. Tytus, J. Ullian, R. Vesley, V. Vučković, J. Vuillemin, A. Walters, G. Weaver, P. Weingartner, K. Weston, W. Wilcox, H. Williams, W. Wisdom, J. Woods, C. Works, J. Wu, M. Yntema, W. Yourgrau, H. Zassenhaus, J. Zeman.

AUTHOR INDEX

- ANDERSON, MICHAEL
1. Note on an inequality of Tibor Rado VIII 159-160
 2. Approximation to a decision procedure for the halting problem IX 305-312
 3. Note on the mortality problem for shift state trees X 275-276
- ANGELELLI, IGNACIO
1. Leibniz's misunderstanding of Nizolius' notion of 'multitudo' VI 319-322
 2. (and Terrell Ward Bynum) Note on Frege's Begriffsschrift VII 369-370
 3. On identity and interchangeability in Leibniz and Frege VIII 94-100
- ASENJO, F. G.
1. Relations irreducible to classes IV 193-200
 2. The arithmetic of the term-relation number theory VI 223-228
 3. A calculus of antinomies VII 103-105
 4. Rings of term-relation numbers as non-standard models VIII 24- 26
- ASHWORTH, E. J.
1. Propositional logic in the sixteenth and early seventeenth centuries IX 179-192
 2. Petrus Fonseca and material implication IX 227-228
- BACON, JOHN
1. Syllogistic without existence VIII 195-219
- BAKER, A. J.
1. Non-empty complex terms VII 48- 56
- BARBACK, JOSEPH
1. A note on regressive isols VII 203-205
- BARBÒ, FRANCESCA RIVETTI
1. see RIVETTI BARBÒ, FRANCESCA
- BEATTY, RICHARD
1. Peirce's development of quantifiers and of predicate logic X 64- 76
- BELNAP, NUEL D., JR.
1. (and Hugues Leblanc) Intuitionism reconsidered III 79- 82
 2. (and Richmond H. Thomason) A rule-completeness theorem IV 39- 43
 3. (with Hugues Leblanc and Richmond H. Thomason) On not strengthening intuitionistic logic IV 313-320
- BIRD, OTTO
1. The formalizing of the topics in mediaeval logic I 138-149
 2. Topic and consequence in Ockham's logic II 65- 78
 3. What Peirce means by leading principles III 175-178
- BLOOM, STEPHEN L.
1. A note on the arithmetical hierarchy IX 89- 91
 2. A semi-completeness theorem X 303-308
- BOCHEŃSKI, INNOCENTIUS M.
1. Preface to: Bibliography of soviet work in the field of mathematical logic and the foundations of mathematics, from 1917-1957 III 1- 4

- BOH, IVAN
1. A study in Burleigh: Tractatus de regulis generalibus consequentiarum. III 83-101
 2. Walter Burleigh's hypothetical syllogistic. IV 241-269
 3. Propositional connectives, supposition, and consequence in Paul of Pergola VII 109-128
- BOLLMAN, DOROTHY
1. Formal nonassociative number theory VIII 9- 16
- BOUVÈRE, KAREL L. DE
1. Remarks on classification of theories by their complete extensions X 1- 17
- BREDLAU, CARL E.
1. Regressive functions and combinatorial functions VIII 301-310
- BRIGNOLE, DIANA
1. Equational characterization of Nelson algebra X 285-297
- BRUMM, GORDON L.
1. The method of possibility-diagrams for testing the validity of certain types of inferences, based on Jevons' logical alphabet III 209-233
- BULL, R. A.
1. An axiomatization of Prior's modal calculus \mathbf{Q} V 211-214
 2. A modal extension of intuitionist logic VI 142-146
 3. On the extension of $S4$ with $CLMpMLp$ VIII 325-329
 4. On three related extensions of $S4$ VIII 330-334
- BYNUM, TERRELL WARD
1. (and Ignacio Angelelli) Note on Frege's Begriffsschrift. VII 369-370
- CALABRESE, PHILIP
1. The Menger algebras of 2-place functions in the 2-valued logic. VII 333-340
- CANTY, JOHN THOMAS
1. Completeness of Copi's method of deduction IV 142-144
 2. A natural deduction system for modal logic. V 199-210
 3. A note on the axiomatization of Rubin's system (\mathbf{S}) VI 190-192
 4. Systems classically axiomatized and properly contained in Lewis's $S3$ VI 309-318
 5. (and Thomas W. Scharle) Note on the singularities of $S5$ VII 108
 6. On symbolizing singular $S5$ functions IX 340-342
 7. The numerical epsilon. X 47- 63
 8. Leśniewski's terminological explanations as recursive concepts X 337-369
 9. (and Ann W. Lauer) Author index, Volumes I-X (1960-1969) X 453-468
- CARNES, R. D.
1. (and W. C. Wilcox) An infix, punctuation-free notation IX 171-178
 2. A reduction procedure for Sheffer stroke formulas. X 331-335
- CARPENTIER, SR. M. ADRIAN, O.S.U.
1. Creative sequences and double sequences IX 35- 61
- CATON, CHARLES E.
1. A stipulation of a modal propositional calculus in terms of modalized truth-values IV 224-226

- CHANDLER, HUGH S.
 1. Logical continuity IX 325-328
- CHANG, CHUNG-YING
 see CHENG, CHUNG-YING
- CHENG, CHUNG-YING
 1. On explanation of number progression IX 329-334
- CHIARAVIGLIO, LUCIO
 1. (and Albert M. Sweet) The pragmatics of truth functions V 191-198
- CLAY, ROBERT E.
 1. The number of moduli in n -ary relations. I 118-121
 2. A simple proof of functional completeness in many-valued logics based on Łukasiewicz's C and N III 114-117
 3. A standard form for Łukasiewicz many-valued logics IV 59- 66
 4. (and S. K. Sehgal) Boolean algebroids. V 154-157
 5. The relation of weakly discrete to set and equinumerosity in mereology VI 325-340
 6. On the definition of mereological class. VII 359-360
- COCCHIARELLA, NINO B.
 1. A substitution free axiom set for second order logic X 18- 30
- COLE, RICHARD
 1. Definitional Boolean calculi IX 343-350
- COPPOTELLI, FRED
 1. A first order type theory for the theory of sets IX 367-370
- CORCORAN, JOHN
 1. (and George Weaver) Logical consequence in modal logic: Natural deduction in $S5$ X 370-384
- CRESSWELL, M. J.
 1. A Henkin completeness theorem for T VIII 186-190
 2. Alternative completeness theorems for modal systems VIII 339-345
 3. Some proofs of relative completeness in modal logic. IX 62- 66
 4. Completeness without the Barcan formula. IX 75- 80
- CROSSON, FREDERICK JAMES
 1. Formal logic and formal ontology in Husserl's phenomenology III 259-269
- DOSS, RAOUF
 1. On Gödel's proof that $V = L$ implies the generalized continuum hypothesis. IV 283-287
- DOWDY, SHIRLEY WILDE
 1. A new condition for a modular lattice III 284-286
 2. A quaternary relation as the primitive notion in several geometries VI 241-295
- DREBEN, BURTON
 1. (and Hilary Putnam) The Craig interpolation lemma VIII 229-233
- EBERLE, ROLF A.
 1. Some complete calculi of individuals VIII 267-278
- ENDERTON, H. B.
 1. On provable recursive functions IX 86- 88

EVANS, TREVOR	
1. An unsolvable problem concerning identities	X 413-414
FARRE, GEORGE L.	
1. Remarks on the linguistic foundations of physics	VI 110-122
FAST, HENRYK	
1. A remark on continuous selectors	VII 106-107
FISK, MILTON	
1. Language and the having of concepts. I	II 41- 57
2. Language and the having of concepts. II	II 177-192
3. The logic of either-or	VI 39- 50
FOXLEY, ERIC	
1. The determination of all Sheffer functions in 3-valued logic, using a logical computer	III 41- 50
FRASCELLA, WILLIAM J.	
1. A generalization of Sierpiński's theorem on Steiner triples and the axiom of choice	VI 163-179
2. Corrigendum and addendum to my paper: "A generalization of Sierpiński's theorem on Steiner triples and the axiom of choice"	VI 323-324
3. The construction of a Steiner triple system on sets of the power of the continuum without the axiom of choice .	VII 196-202
4. Combinatorial designs on infinite sets	VIII 27- 47
5. The non-existence of a certain combinatorial design on an infinite set.	X 317-323
GEMIGNANI, MICHAEL C.	
1. Topological geometries and a new characterization of \mathbf{R}^m .	VII 57-100
2. On eliminating an unwanted axiom in the characterization of \mathbf{R}^m using topological geometries	VII 365-366
3. A note on $\text{Bd}X$	VII 367-368
4. A characterization of \mathbf{S}^m by means of topological geometries	VIII 220-224
5. On the independence of certain axioms in the definition of an m -arrangement	VIII 225-226
GODDARD, LEONARD	
1. An augmented modal logic	VI 81- 98
2. Towards a logic of significance. Part I: The sentential basis	IX 233-264
GOE, GEORGE	
1. Three axiom negation-alternation formulations of the truth-functional calculus	V 129-132
2. A reconstruction of formal logic	VII 129-157
3. Corrections to my paper: "A reconstruction of formal logic".	VII 158
GOETZ, ABRAHAM	
1. Algebraic independence in an infinite Steiner triple system	VIII 51- 55
GOODSTEIN, RUBEN L.	
1. (and J. Hooley) On recursive transcendence	I 127-137
GRILLIOT, THOMAS J.	
1. Selection functions for recursive functionals	X 225-234

- HACKER, EDWARD A.
1. Number system for the immediate inferences and the syllogism in Aristotelian logic VIII 318-320
 2. (and William Tuthill Parry) Pure numerical Boolean syllogisms. VIII 321-324
- HANSON, NORWOOD RUSSELL (1924-1967)
1. The Gödel theorem II 94-110
 2. A note on The Gödel theorem II 228
- HEATH, I. J.
1. Omitting the replacement schema in recursive arithmetic VIII 234-238
- HENRY, DESMOND PAUL
1. The truncation of truth-functional calculation. II 193-205
 2. An Anselmian regress. III 193-198
 3. Ockham, *suppositio*, and modern logic V 290-292
 4. Leśniewski's ontology and some medieval logicians X 324-326
- HERMES, HANS
1. In memoriam Wilhelm Ackermann (1896-1962) VIII 1- 8
- HEYTING, AREND
1. In memoriam Evert Willem Beth (1909-1964) VII 289-295
- HOOLEY, J.
1. (and Ruben L. Goodstein) On recursive transcendence. I 127-137
- IHRIG, ANN H.
1. The Post-Linial theorems for arbitrary recursively enumerable degrees of unsolvability. VI 54- 72
- JAFFE, WOODROW
1. The syntax of projective geometry. VII 328-332
- JORDAN, ZBIGNIEW
1. Logical determinism. IV 1- 38
- KALINOWSKI, GEORGES
1. Obligation dérivée et logique déontique relationnelle. V 181-190
- KAPLAN, DAVID
1. (and Richard Montague) A paradox regained I 79- 90
- KEARNS, JOHN T.
1. The contribution of Leśniewski VIII 61- 93
 2. The logical concept of existence IX 313-324
 3. Two views of variables X 163-180
- KROM, MELVIN R.
1. A property of sentences that define quasi-order. VII 349-352
- KÜNG, GUIDO
1. Bibliography of soviet work in the field of mathematical logic and the foundations of mathematics, from 1917-1957 III 1- 40
 2. Concrete and abstract properties. V 31- 36
- KUTSCHERA, FRANZ VON
1. Zur semantischen Begründung der klassischen und der intuitionistischen Logik VII 20- 47

- LAMBERT, KAREL
1. Existential import revisited IV 288-292
 2. On logic and existence VI 135-141
 3. Free logic and the concept of existence VIII 133-144
- LAROCHE, LAURENT
1. Examination of the axiomatic foundations of a theory of change. I IX 371-384
 2. Examination of the axiomatic foundations of a theory of change. II X 277-284
 3. Examination of the axiomatic foundations of a theory of change. III X 385-409
- LAUER, ANN W.
1. (and John Thomas Canty) Author index, Volumes I-X (1960-1969) X 453-468
- LEBLANC, HUGUES
1. On a recent allotment of probabilities to open and closed sentences I 171-175
 2. (and Nuel D. Belnap, Jr.) Intuitionism reconsidered III 79- 82
 3. Structural rules of inference III 201-205
 4. Proof routines for the propositional calculus IV 81-104
 5. (with Nuel D. Belnap, Jr., and Richmond H. Thomason) On not strengthening intuitionistic logic IV 313-320
 6. Two separation theorems for natural deduction VII 159-180
 7. Syntactically free, semantically bound (A note on variables) IX 167-170
- LEE, R. D.
1. The substitution schema in recursive arithmetic VI 193-200
- LEININGER, C. W.
1. Concerning some proposals for quantum logic X 95- 96
- LEJEWSKI, CZESŁAW
1. Studies in the axiomatic foundations of Boolean algebra. I I 23- 47
 2. Studies in the axiomatic foundations of Boolean algebra. II I 91-106
 3. Studies in the axiomatic foundations of Boolean algebra. III II 79- 93
 4. On prosleptic syllogisms II 158-176
 5. A note on a problem concerning the axiomatic foundations of mereology IV 135-139
 6. A single axiom for the mereological notion of proper part VIII 279-285
- LEMMON, EDWARD JOHN (1930-1966)
1. An extension algebra and the modal system T I 3- 12
 2. Some results on finite axiomatizability in modal logic VI 301-308
 3. A note on Halldén-incompleteness VII 296-300
- LIU, SHIH-CHAO
1. Four types of general recursive well-orderings III 75- 78
 2. Recursive linear orderings and hyperarithmetical functions III 129-132
- LOEWEN, KENNETH
1. Modified strong reduction in combinatory logic IX 265-270
 2. A *standardization theorem for strong reduction* IX 271-283
 3. The Church Rosser theorem for strong reduction in combinatory logic IX 299-302

- LYNGHOLM, CARL
1. (and Wolfgang Yourgrau) A double-iteration property of Boolean functions I 111-114
- MACKIE, JOHN L.
1. Conditionally-restricted operations II 236-243
- MARKHAM, SR. MARY JUSTIN, R.S.M.
1. A group-theoretic characterization of the ordinary and isotropic Euclidean planes VII 209-238
- MASSEY, GERALD J.
1. Note on Copi's system IV 140-141
 2. An extension of Venn diagrams VII 239-250
 3. Normal form generation of S5 functions via truth functions. IX 81- 85
- MCCALL, STORRS
1. A simple decision procedure for one-variable implication/negation formulae in intuitionist logic. III 120-122
 2. Contrariety VIII 121-132
- MCCLEARY, STEPHEN H.
1. Primitive recursive computations VIII 311-317
- MCKAY, C. G.
1. Some completeness results for intermediate propositional logics VIII 191-194
 2. Implicationless wffs in IC. VIII 227-228
 3. Correction to my paper: "Some completeness results for intermediate propositional logics" IX 388
- MCLAUGHLIN, THOMAS G.
1. On an extension of a theorem of Friedberg III 270-273
 2. A note on pseudo doubly creative pairs. V 24- 26
 3. Strong reducibility on hypersimple sets VI 229-234
- MENDELSON, ELLIOTT
1. On some recent criticism of Church's thesis. IV 201-205
- MENGER, KARL
1. (and Martin Schultz) Postulates for the substitutive algebra of the 2-place functors in the 2-valued calculus of propositions. IV 188-192
- MEREDITH, CAREW A.
1. (and Arthur N. Prior) Notes on the axiomatics of the propositional calculus IV 171-187
 2. (and Arthur N. Prior) Modal logic with functorial variables and a contingent constant VI 99-109
 3. (and Arthur N. Prior) Equational logic. IX 212-226
 4. Equational postulates for the Sheffer stroke. X 266-270
 5. Terminal functors permissible with syllogistic X 309-312
- MIHĂILESCU, EUGEN
1. Decision problem in the classical logic. VIII 239-253
 2. L'ordre d'incomplétude pour le système d'équivalence la négation et la réciprocity. X 425-451
- MINICHIELLO, J. KENT
1. An extension of negationless logic X 298-302

MONTAGUE, RICHARD	
1. (and David Kaplan) A paradox regained.	I 79- 90
MORENO, ALBERTO	
1. Lógica propositional en Juan de Santo Tomás.	IV 113-134
MULLIN, ALBERT A.	
1. Correlative remarks concerning elementary number theory, groups and mutant sets	II 253-254
2. A note on a weakened Goldbach-like conjecture	III 118-119
3. Some theorems on the structure of mutant sets and their application to group and ring theories.	III 148-151
4. On differences of certain structured sets	IV 158-160
5. Mathematico-philosophical remarks on new theorems analogous to the fundamental theorem of arithmetic	VI 218-222
6. On a proper class and related matters	VII 101-102
7. C.S.S. Peirce and E.G.A. Husserl on the nature of logic.	VII 301-304
8. On new theorems for elementary number theory.	VIII 353-356
MYHILL, JOHN	
1. Variations on a theme of Bernays	IV 274-282
NEMITZ, WILLIAM C.	
1. Semi-Boolean lattices	X 235-238
NIELSEN, HARRY A.	
1. Language as existent.	II 244-250
2. The bearer of ontological commitment	V 133-138
O'BRIANT, WALTER H.	
1. Leibniz's preference for an intensional logic (A reply to Mr. Parkinson).	VIII 254-256
OHASHI, KEMPACHIRO	
1. A stronger form of a theorem of Friedberg.	V 10- 12
PARRY, WILLIAM TUTHILL	
1. (and Edward A. Hacker) Pure numerical Boolean syllogisms.	VIII 321-324
PARSONS, CHARLES	
1. A propositional calculus intermediate between the minimal calculus and the classical.	VII 353-358
2. Corrigendum to my paper: "A propositional calculus intermediate between the minimal calculus and the classical"	X 336
PARTIS, M. T.	
1. Limited universal and existential quantifiers in commutative partially ordered recursive arithmetics	VIII 17- 23
PATTON, THOMAS E.	
1. A system of quantificational deduction	IV 105-112
2. A liberalized system of quantificational deduction.	V 293-294
3. Church's theorem on the decision problem	VI 147-153
PERKINS, PETER	
1. Unsolvable problems for equational theories	VIII 175-185
PETERS, RICHARD	
1. Two remarks concerning Menger's and Schultz' postulates for the substitutive algebra of the 2-place functors in the 2-valued calculus of propositions	V 125-128

- POGORZELSKI, HENRY A.
1. Commutative recursive word arithmetic in the alphabet of prime numbers. V 13- 23
- PRIOR, ARTHUR N.
1. On a family of paradoxes II 16- 32
 2. Quantification and \perp -modality III 142-147
 3. (and Carew A. Meredith) Notes on the axiomatics of the propositional calculus IV 171-187
 4. Axiomatisations of the modal calculus \mathbf{Q} V 215-217
 5. K1, K2 and related modal systems V 299-304
 6. (and Carew A. Meredith) Modal logic with functorial variables and a contingent constant VI 99-109
 7. (and Carew A. Meredith) Equational logic IX 212-226
 8. Propositional calculus in implication and non-equivalence X 271-272
 9. On the calculus \mathbf{MCC} X 273-274
 10. Corrigendum to C.A. Meredith's and my paper: "Equational logic" X 452
- PURTILL, RICHARD L.
1. Doing logic by computer. X 150-162
- PUTNAM, HILARY
1. A note on constructible sets of integers IV 270-273
 2. (and Burton Dreben) The Craig interpolation lemma VIII 229-233
- RAGGIO, ANDRÉS R.
1. Direct consistency proof of Gentzen's system of natural deduction. V 27- 30
 2. Propositional sequence-calculi for inconsistent systems IX 359-366
- RAINICH, G. Y. (1886-1968)
1. A formal system. I 123-126
 2. Notes on foundations. Note I. Vectors and Axioms. II 224-227
 3. Notes on foundations. Note II. On Galois Connections. III 61- 63
- REICHBACH, JULIUSZ
1. On characterizations of the first-order functional calculus. II 1- 15
 2. A note to my paper: "On characterizations of the first-order functional calculus" II 251-252
 3. On the connection of the first-order functional calculus with many-valued propositional calculi III 102-107
 4. A note about connection of the first-order functional calculus with many-valued propositional calculi V 158-160
 5. On the connection of the first-order functional calculus with \mathfrak{N}_0 propositional calculus VI 73- 80
 6. A note on theses of the first-order functional calculus. IX 335-339
 7. Some examples of different methods of formal proofs with generalizations of the satisfiability definition. X 214-224
- RENNIE, M. K.
1. Theory of procedures. I. Simple conditionals X 97-112
- RESCHER, NICHOLAS
1. On the formalization of two modal theses II 154-157
 2. Avicenna on the logic of "conditional" propositions IV 48- 58
 3. A note on self-referential statements V 218-220
 4. An intuitive interpretation of systems of four-valued logic. VI 154-156
 5. On modal renderings of intuitionistic propositional logic VII 277-280

RESNIK, MICHAEL D.	
1. A decision procedure for positive implication	III 179-186
2. A note on natural deduction.	VII 206-208
RISTEA, TUDOR	
1. On propositional, truth and Boolean functions.	IX 160-166
RIVETTI BARBÒ, FRANCESCA	
1. A philosophical remark on Gödel's unprovability of consistency proof	IX 67- 74
ROSENBERG, JAMES	
1. The application of ternary semigroups to the study of n -valued Sheffer functions	X 90- 94
ROUTLEY, R.	
1. Some things do not exist.	VII 251-276
2. Existence and identity in quantified modal logics	X 113-149
RUBIN, H.	
1. (and J. E. Rubin) A theorem on n -tuples which is equivalent to the well-ordering theorem	VIII 48- 50
RUBIN, J. E.	
1. (and H. Rubin) A theorem on n -tuples which is equivalent to the well-ordering theorem	VIII 48- 50
SAITO, SETSUO	
1. Truth value assignment in predicate calculus of first order	IV 216-223
2. On the Leibnizian modal system	IX 92- 96
3. A theory of categorical syllogism	X 327-330
SANCHIS, LUIS ELPIDIO	
1. Nueva demostracion de la completicidad funcional del calculo proposicional bivalente	II 33- 40
2. Types in combinatory logic.	V 161-180
3. Functionals defined by recursion.	VIII 161-174
SAYRE, KENNETH M.	
1. Propositional logic in Plato's Protagoras	IV 306-312
2. Syllogistic inference within the propositional calculus	V 238-240
SCHARLE, THOMAS W.	
1. A diagram of the functors of the two-valued propositional calculus	III 243-255
2. Note to my paper: "A diagram of the functors of the two-valued propositional calculus"	III 287-288
3. Axiomatization of propositional calculus with Sheffer functors	VI 209-217
4. (and John Thomas Canty) Note on the singularities of S5	VII 108
5. Single axiom schemata for D and S.	VII 344-348
SCHOCK, ROLF	
1. Some definitions of subjunctive implication, of counterfactual implication, and of related concepts.	II 206-221
2. A note on subjunctive and counterfactual implication	III 289-290
3. Contributions to syntax, semantics, and the philosophy of science.	V 241-289
4. What is a science?	VI 51- 53
5. On probability logics.	VI 129-134

6. On induction. VI 235-240
7. A simple version of the generalized continuum hypothesis . VII 287-288
- SCHULTZ, MARTIN
1. (and Karl Menger) Postulates for the substitutive algebra of the 2-place functors in the 2-valued calculus of propositions. IV 188-192
- SCHUMM, GEORGE F.
1. A note on the structure of the power set IX 303-304
2. On some open questions of B. Sobociński. X 261-262
3. On a modal system of D. C. Makinson and B. Sobociński . . X 263-265
- SEHGAL, S. K.
1. Jacobson theory of ringoids IV 206-215
2. (and Robert E. Clay) Boolean algebroids. V 154-157
- SELDIN, JONATHAN P.
1. Note on definitional reductions IX 4- 6
2. Corrigendum to my paper: "Note on definitional reductions" X 412
- SHUKLA, ANJAN
1. A set of axioms for the propositional calculus with implication and converse non-implication VI 123-128
2. A set of axioms for the propositional calculus with implication and non-equivalence VII 281-286
3. A note on the axiomatizations of certain modal systems. . . VIII 118-120
4. A note on independence X 410-411
- SIBAJIBAN
1. The middle term. IX 229-232
- SIERPIŃSKI, WACŁAW
1. Sur un théorème équivalent à l'axiome du choix VI 161-162
2. L'axiome du choix. VIII 257-266
- SIKORA, JOSEPH J., S.J. (1932-1967)
1. Some Thomist reflections on the foundations of formal logic. VI 1- 38
- SIMONS, LEO
1. A reduction in the number of independent axiom schemata for S_4 III 256-258
- SINGLETARY, W. E.
1. Results regarding the axiomatization of partial propositional calculi IX 193-211
- SINISI, VITO F.
1. Leśniewski's analysis of Whitehead's theory of events. . . VII 323-327
2. Leśniewski and Frege on collective classes. X 239-246
- SIOSON, FEDERICO M.
1. Further axiomatizations of the Łukasiewicz three-valued calculus V 62- 70
- SKALA, HELEN L.
1. The irreducible generating sets of 2-place functions in the 2-valued logic VII 341-343
- SKOLEM, THORALF (1887-1963)
1. Investigations on a comprehension axiom without negation in the defining propositional functions. I 13- 22

2. Proof of some theorems on recursively enumerable sets. III 65- 74
3. Addendum to my article: "Proof of some theorems on recursively enumerable sets". IV 44- 47
4. Studies on the axiom of comprehension. IV 162-170
- SMILEY, TIMOTHY
1. On Łukasiewicz's \mathcal{L} -modal system. II 149-153
- SOBOCIŃSKI, BOLESŁAW
1. On the single axioms of protothetic. I I 52- 73
2. A simple formula equivalent to the axiom of choice. I 115-117
3. A note concerning the axiom of choice I 122
4. Three set-theoretical formulas. II 58- 64
5. On the single axioms of protothetic. II. II 111-126
6. A note concerning the many-valued propositional calculi II 127-128
7. On the single axioms of protothetic. III II 129-148
8. Certain formulas equivalent to the axiom of choice. II 229-235
9. A theorem on Hartogs' alephs. II 255-258
10. A contribution to the axiomatization of Lewis' system S5. III 51- 60
11. A note on the regular and irregular modal systems of Lewis. III 109-113
12. On the generalized Brouwerian axioms. III 123-128
13. A set-theoretical formula equivalent to the axiom of choice III 167-169
14. Six new sets of independent axioms for distributive lattices with O and I III 187-192
15. An axiom-system for $\{K;N\}$ -propositional calculus related to Simons' axiomatization of S3. III 206-208
16. A note on the generalized continuum hypotheses. I. III 274-278
17. A remark concerning the third theorem about the existence of successors of cardinals III 279-283
18. A note on the generalized continuum hypothesis. II. IV 67- 79
19. A note on modal systems IV 155-157
20. A note on the generalized continuum hypothesis. III. IV 233-240
21. A theorem of Sierpiński on triads and the axiom of choice V 51- 58
22. Remarks about axiomatizations of certain modal systems V 71- 80
23. A note on Prior's systems in "The theory of deduction" V 139-140
24. On the propositional system \mathbf{A} of Vučković and its extension. I. V 141-153
25. On the propositional system \mathbf{A} of Vučković and its extension. II. V 223-237
26. Modal system S4.4 V 305-312
27. Family \mathcal{K} of the non-Lewis modal systems V 313-318
28. A note on certain set-theoretical formulas VI 157-160
- SOUZA, CELSO DE RENNA E
1. A note on continuous games, the notion of strategy and Zermelo's axiom VI 183-189
- STEGMÜLLER, WOLFGANG
1. Remarks on the completeness of logical systems relative to the validity-concepts of P. Lorenzen and K. Lorenz. V 81-112
2. Eine modelltheoretische Präzisierung der Wittgensteinschen Bildtheorie. VII 181-195
- STOPES-ROE, HARRY V.
1. An economy in the formation rules for quantification theory X 313-316
- STRAUSS, PAUL
1. Some systems of natural deduction. VIII 286-290

- SUMMERSBEE, S.
1. (and A. Walters) Programming the functions of formal logic. I. III 133-141
 2. (and A. Walters) Programming the functions of formal logic. II. (Multi-valued logics). IV 293-305
- SUSZKO, ROMAN
1. Ontology in the *Tractatus* of L. Wittgenstein IX 7- 33
- SWEET, ALBERT M.
1. Toward a pragmatcal explication of epistemic modalities IV 145-150
 2. (and Lucio Chiaraviglio) The pragmatics of truth functions V 191-198
 3. The pragmatics of monadic quantification X 31- 46
- SZÉKELY, DAVID L.
1. Die Theorie der Umgangssprache als interpretierter Kompositkalkül. I 150-170
 2. A theory of translation and transformation of languages. III 152-166
 3. A preliminary report on the theory of unification of sciences and its concept transforming automaton III 234-242
 4. On general purpose unifying automata. VII 305-322
 5. The principles of the theory of the unification of sciences X 181-213
- THOMAS, IVO
1. Independence of Faris-rejection-axioms I 48- 51
 2. Independence of Tarski's Law in Henkin's propositional fragments I 74- 78
 3. Functional completeness of Henkin's propositional fragments I 107-110
 4. The rule of excision in positive implication. III 64
 5. On the infinity of positive logic III 108
 6. Finite limitations on Dummett's LC. III 170-174
 7. Solutions of five modal problems of Sobociński. III 199-200
 8. $S1^0$ and Brouwerian axioms. IV 151-152
 9. $S1^0$ and generalized $S5$ -axioms IV 153-154
 10. A final note on $S1^0$ and the Brouwerian axioms. IV 231-232
 11. Modal systems in the neighbourhood of T V 59- 61
 12. Universal variable non-Tarskian functors V 221-222
 13. Decision procedures for $S2^0$ and T^0 V 319-320
 14. The written liar and Thomas Oliver VI 201-208
 15. Three-valued propositional fragments with classical implication VIII 145-147
 16. A theorem on $S4.2$ and $S4.4$ VIII 335-336
 17. Decision for $K4$ VIII 337-338
 18. In memoriam Edward John Lemmon (1930-1966) IX 1- 3
 19. The rule of Peirce IX 34
- THOMASON, RICHMOND H.
1. (and Nuel D. Belnap, Jr.) A rule-completeness theorem IV 39- 43
 2. (with Nuel D. Belnap, Jr. and Hugues Leblanc) On not strengthening intuitionistic logic IV 313-320
 3. A decision procedure for Fitch's propositional calculus. VIII 101-117
- TOMPKINS, ROBERT R.
1. On Kleene's recursive realizability as an interpretation for intuitionistic elementary number theory. IX 289-293
- TRENTMAN, JOHN
1. Leśniewski's ontology and some medieval logicians VII 361-364

- TREW, A.
 1. Incompleteness of a logic of Routley's IX 385-387
- TURSMAN, RICHARD
 1. The shortest axioms of the implicational calculus. IX 351-358
- TYTUS, FRANCIS J.
 1. A theorem for deriving consequences of the axiom of choice. VIII 291-296
 2. An elementary construction of the natural numbers. VIII 297-300
- ULLIAN, JOSEPH S.
 1. A theorem on maximal sets II 222-223
- VESLEY, RICHARD E.
 1. On strengthening intuitionistic logic. IV 80
- VUČKOVIĆ, VLADETA
 1. On a class of regular sets V 113-124
 2. Note on a theorem of W. Sierpiński VI 180-182
 3. Recursive models for three-valued propositional calculi with classical implication. VIII 148-153
 4. A recursive model for the extended system \mathcal{A} of B. Sobociński. VIII 154-158
- VUILLEMIN, JULES
 1. Sur les conditions qui permettent d'utiliser les matrices russelliennes des antinomies (1905) pour exprimer les théorèmes de limitations internes des formalismes VII 1- 19
- WALTERS, A.
 1. (and S. Summersbee) Programming the functions of formal logic. I. III 133-141
 2. (and S. Summersbee) Programming the functions of formal logic. II. (Multi-valued logics). IV 293-305
- WEAVER, GEORGE
 1. (and John Corcoran) Logical consequence in modal logic: Natural deduction in S5 X 370-384
- WEINGARTNER, PAUL
 1. Modal logics with two kinds of necessity and possibility. . . IX 97-159
- WESTON, KENNETH
 1. On predicate letter formulas which have no substitution instances provable in a first order language VI 296-300
- WILCOX, W. C.
 1. (and R. D. Carnes) An infix, punctuation-free notation . . IX 171-178
- WILDE, SR. PAULA MARIE, S.S.N.D.
 see DOWDY, SHIRLEY WILDE
- WILLIAMS, H. P.
 1. A formalisation of the arithmetic of the ordinals less than ω^ω X 77- 89
- WISDOM, WILLIAM A.
 1. Possibility-elimination in natural deduction. V 295-298
- WOODS, JOHN H.
 1. Non-paradoxical paradoxes? VIII 346-352

- WORKS, CHANDLER
1. (and Wolfgang Yourgrau) Note on duality in propositional calculus IX 284-288
- WU, JOSEPH S.
1. The problem of existential import (From George Boole to P. F. Strawson) X 415-424
- YNTEMA, MARY KATHERINE
1. A detailed argument for the Post-Linial theorems V 37- 50
- YOURGRAU, WOLFGANG
1. (and Carl Lyngholm) A double-iteration property of Boolean functions I 111-114
 2. (and Chandler Works) Note on duality in propositional calculus IX 284-288
- ZASSENHAUS, HANS
1. Emil Artin, his life and his work (1898-1962). V 1- 9
- ZEMAN, J. JAY
1. Bases for S4 and S4.2 without added axioms. IV 227-230
 2. The deduction theorem in S4, S4.2, and S5. VIII 56- 60
 3. The propositional calculus MC and its modal analog IX 294-298
 4. Modal systems in which necessity is "factorable" X 247-256
 5. Complete modalization in S4.4 and S4.0.4 X 257-260
