CONTENTS

Volume 174, no. 1 and no. 2

Christopher J. Bishop, A distance formula for algebras on the disk 1

Vyjayanthi Chari and Andrew Pressley, Quantum affine algebras and affine Hecke algebras 295

P. Charpentier and J. Ortega-Cerdà, On the zero sets of bounded holomorphic functions in the bidisc 327

Fernando Cukierman, Rigidity of isotropic maps 29

Ian Graham and Dror Varolin, Bloch constants in one and several variables 347

Tom Halverson, Characters of the centralizer algebras of mixed tensor representations of $GL(r, \mathbb{C})$ and the quantum group $\mathcal{U}_q(g\ell(r, \mathbb{C}))$. 359

Rebecca A. Herb, The Schwartz space of a general semisimple Lie group V : Schwartz class wave packets 43

Shulim Kaliman, Rational polynomials with a C*-fiber 141

E. Kissin, A.I. Loginov and V.S. Shulman, Derivations of C^*-algebras and almost Hermitian representations on Π_k-spaces 411

Teruaki Kitano, Twisted Alexander polynomial and Reidemeister torsion 431

Steven G. Krantz and Song-Ying Li, Explicit solutions for the corona problem with Lipschitz data in the polydisc 443

David B. Massey, Prepolar deformations and a new Lê-Iomdine formula .. 459

Kevin McClanahan, KK-groups of twisted crossed products by groups acting on trees 471

J. Miles and J. Rossi, Linear combinations of logarithmic derivatives of entire functions with applications to differential equations 195

Karl-Hermann Neeb, Coherent States, holomorphic extensions, and highest weight representations 497

N. Christopher Phillips, Factorization problems in the invertible group of a homogeneous C*-algebraa 215

Richard Rochberg, Higher order estimates in complex interpolation theory 247

Andreas Seeger, Endpoint inequalities for Bochner-Riesz multipliers in the plane 543

Ted Stanford, Braid commutators and Vassiliev invariants 269

Xiangsheng Xu, On the Cauchy problem for a singular parabolic equation 277

Xingwang Xu, On the existence of extremal metrics 555

Rugang Ye, Constant mean curvature foliation: singularity structure and curvature estimate 569

PREPARATION OF MANUSCRIPTS

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be in typed form, double spaced with large margins. The first paragraph must be capable of being used separately as an abstract of the entire paper. In particular, it should not contain any bibliographic references. Please classify the paper according to the Mathematics Subject Classification scheme which can be found in the December index volumes of *Mathematical Reviews*. Supply the name, address and e-mail address of the author to whom correspondence should be sent. Manuscripts, in triplicate, may be sent to any one of the editors. All other communication should be addressed to Julie Honig, Department of Mathematics, University of California, Los Angeles, CA 90095-1555 (e-mail: julie@math.ucla.edu).

After a paper is accepted for publication, the corresponding author will be asked by the Managing Editor's office to submit to it the TeX file of the paper, if one is available. The file may be transmitted by e-mail or mailed in floppy diskette form. Page proofs will be mailed to the corresponding author.

OFFPRINTS

The corresponding author will receive 100 free offprints within a month after the paper is published. An offprint order form will be sent to the corresponding author so that additional offprints may be purchased.

PAGE CHARGES

To cover part of the cost of publication, a bill for page charges will be sent to the corresponding author. Authors are expected to pay these charges from their research or institutional funds. In no case is an author personally responsible for paying page charges.
