

CONTENTS

N. H. Anh and V. M. Son , Enveloping algebras of Lie groups with discrete series	1
J. Aramaki , Asymptotic behavior of eigenvalues for a class of pseudodifferential operators on \mathbf{R}^n	19
A. Balog and J. Friedlander , A hybrid of theorems of Vinogradov and Piatetski-Shapiro	45
A. M. Bruckner and J. Ceder , Chaos in terms of the map $x \rightarrow \omega(x, f)$	63
Z. Chen , Local real analytic boundary regularity of an integral solution operator of the $\bar{\partial}$ -equation on convex domains	97
C.-K. Cheung , On some properties of exhaustion maps between bounded domains	107
H. Gunawan , A generalization of maximal functions on compact semisimple Lie groups	119
C. D. Horton , Stability of non-singular group orbits	135
J. F. Hughes , Bordism and regular homotopy of low-dimensional immersions	155
J. P. Lin and F. Williams , On six-connected finite H -spaces	185
