

A — ALGEBRA AND NUMBER THEORY

D. M. Bressoud, <i>A note on gap-frequency partitions</i>	1
J. Brillhart, <i>A double inversion formula</i>	7
D. Handelman and G. Renault, <i>Actions of finite groups on self-injective rings</i>	69
H. A. Keller, <i>On the lattice of all closed subspaces of a Hermitian space</i>	105
R. E. Kennedy, <i>Krull rings</i>	131
D. Riffelmacher, <i>Sweedler's two-cocycles and Hochschild cohomology</i>	181
N. Schwartz, <i>Archimedean lattice-ordered fields that are algebraic over their o-subfields</i>	189
W. J. Wong, <i>Maps on simple algebras preserving zero products I: The associative case</i>	229

B — ANALYSIS

F. Deutsch, G. Nürenberger and I. Singer, <i>Weak Chebyshev subspaces and alternation</i>	9
H. J. Fell, <i>On the zeros of convex combinations of polynomials</i>	43
J. A. Fridy, <i>An addendum to "Tauberian theorems via block dominated matrices"</i>	51
A. Granas, R. B. Guenther and J. W. Lee, <i>Applications of topological transversality to differential equations I. (some nonlinear diffusion problems)</i>	53
M. F. Hutchinson, <i>Local Λ sets for profinite groups</i>	81
V. Losert and H. Rindler, <i>Cyclic vectors for $L^p(G)$</i>	143
C.-L. Shen, <i>A note on the automorphism groups of simple dimension groups</i>	199
K. B. Stolarsky, <i>Mapping properties, growth and uniqueness of Vieta (infinite cosine) products</i>	209

D — GEOMETRY

A. Nobile, <i>On equisingular families of isolated singularities</i>	151
--	-----

E — LOGIC AND FOUNDATIONS

J. A. Larson, R. Laver and G. F. McNulty, <i>Square-free and cube-free colorings of the ordinals</i>	137
---	-----

G — TOPOLOGY

E. Fadell, <i>The relationship between Lusternik-Schnirelman category and the concept of genus</i>	33
A. Kas, <i>On the handlebody decomposition associated to a Lefschetz fibration</i>	89
P. Kenderov, <i>Dense strong continuity of pointwise continuous mappings</i>	111
J. R. Martin and E. D. Tymchatyn, <i>Fixed point sets of 1-dimensional Peano continua</i>	147
K. J. Prevot, <i>Imbedding smooth involutions in trivial bundles</i>	163
T. M. Price, <i>Spanning surfaces for projective planes in four space</i>	169

Our subject classifications are: A — ALGEBRA AND NUMBER THEORY; B — ANALYSIS;
 C — APPLIED MATHEMATICS; D — GEOMETRY; E — LOGIC AND FOUNDATIONS;
 F — PROBABILITY AND STATISTICS; G — TOPOLOGY; H — COMBINATORICS
