Vol. 84, No. 2

CONTENTS

October, 1979

A — ALGEBRA AND NUMBER THEORY

M. A. Bardwell, *The o-primitive components of a regular ordered permutation group*.....261
G. Loupias, *Cohomology over Banach crossed products. Application to bounded derivations and crossed homomorphisms*.....333
J. D. Sally, *Super-regular sequences*.....465

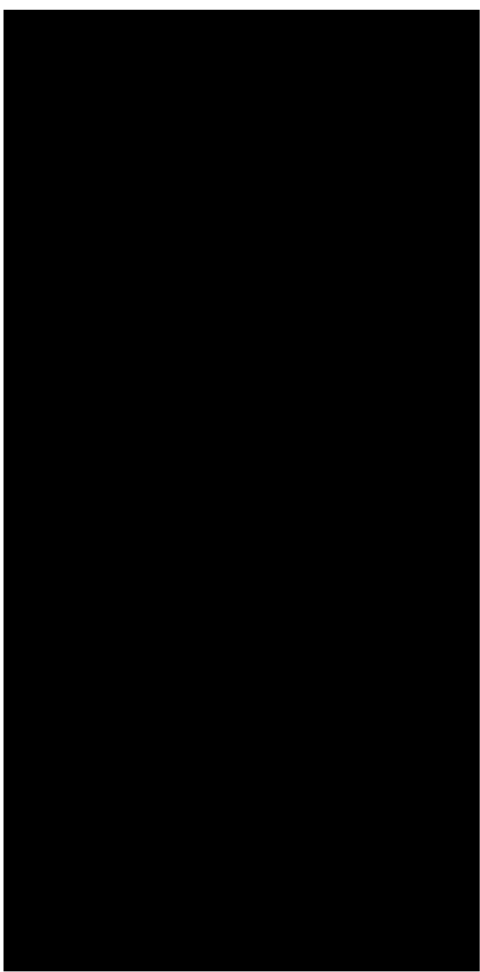
B — ANALYSIS

S. C. Bagchi and A. Sitaram, *Spherical mean periodic functions on semi simple Lie groups*.....241
P. W. Bates and J. R. Ward, Jr., *Periodic solutions of higher order systems*.....275
T. A. Farmer, *On the reduction of certain degenerate principal series representations of* $SP(n, C)$.....291
A. L. T. Paterson, *Amenable groups for which every topological left invariant mean is invariant*.....391
C. R. Putnam, *Operators satisfying a* G_1 *condition*.....413
W. Rupp, *Riesz-presentation of additive and σ-additive set-valued measures*.....445
A. M. Russell, *A commutative Banach algebra of functions of generalized variation*.....455

D — GEOMETRY

R. Löwen, *Symmetric planes*.....367

G — TOPOLOGY

B. J. Ball, *Quasicompactifications and shape theory*.....251
J. Bruijning, *A characterization of dimension of topological spaces by totally bounded pseudometrics*.....283
R. Jerrard and M. D. Meyerson, *Homotopy with M-functions*.....305
J. Keesling and S. Mardešić, *A shape fibration with fibers of different shape*.....319
J. R. Porter and R. G. Woods, *Ultra-Hausdorff H-closed extensions*.....399
M. Rothenberg and J. Sondow, *Nonlinear smooth representations of compact Lie groups*.....427
P. Shanahan, *On the signature of Grassmannians*.....483


Our subject classifications are: A — ALGEBRA AND NUMBER THEORY; B — ANALYSIS; C — APPLIED MATHEMATICS; D — GEOMETRY; E — LOGIC AND FOUNDATIONS; F — STATISTICS; G — TOPOLOGY; H — COMBINATORICS
