

**Pacific  
Journal of  
Mathematics**

VOLUME LXXV

1978

## CONTENTS

Mieczyslaw Altman, <i>General solvability theorems</i> .....	1
Denise et Eric Amar, <i>Sur les suites d'interpolation en plusieurs variables</i> .....	15
Susan J. Andima and W. J. Thron, <i>Order-induced topological properties</i> .....	297
H. S. Bear and G. N. Hile, <i>Algebras which satisfy a second order linear partial differential equation</i> .....	21
Gregory W. Bell, <i>Cohomology of degree 1 and 2 of the Suzuki groups</i> .....	319
Richard Body and Roy Douglas, <i>Rational homotopy and unique factorization</i> .....	331
Marilyn Breen, <i>Sets in <math>R^d</math> having <math>(d-2)</math>-dimensional kernels</i> .....	37
Gavin Brown and William Moran, <i>Analytic discs in the maximal ideal space of <math>M(G)</math></i> .....	45
Ron Brown, <i>Quadratic forms with prescribed Stiefel–Whitney invariants</i> .....	59
Frank L. Capobianco, <i>Fixed sets of involutions</i> .....	339
L. Carlitz, <i>Some theorems on generalized Dedekind–Rademacher sums</i> .....	347
G. D. Chakerian and H. Groemer, <i>On coverings of Euclidean space by convex sets</i> .....	77
Mary R. Embry and Alan Lambert, <i>The structure of a special class of weighted translation semigroups</i> .....	359
S. Feigelstock and Z. Schlüssel, <i>Principal ideal and Noetherian groups</i> .....	87
Steve Ferry, <i>Strongly regular mappings with compact ANR fibers are Hurewicz fiberings</i> .....	373
Ivan Filippenko and Marvin Marcus, <i>On the unitary invariance of the numerical radius</i> .....	383
Ralph Freese and J. B. Nation, <i>Projective lattices</i> .....	93
H. Gingold, <i>Uniqueness of linear boundary value problems for differential systems</i> .....	107
H. Groemer, <i>On the extension of additive functionals on classes of convex sets</i> .....	397
Rita Hall, <i>On the cohomology of Kuga's fiber variety</i> .....	411
Howard Hamilton, <i>Congruences on <math>\mathfrak{R}</math>-semigroups</i> .....	423
John R. Hedstrom and Evan G. Houston, <i>Pseudo-valuation domains</i> .....	137
M. Herrmann and R. Schmidt, <i>Regular sequences and lifting property</i> .....	449

William Josephson, <i>Coallocation between lattices with applications to measure extensions</i> .....	149
James Keesling, <i>Decompositions of the Stone–Čech compactification which are shape equivalences</i> .....	455
Michael J. Klass and Lawrence E. Myers, <i>On stopping rules and the expected supremum of <math>S_n/T_n</math></i> .....	467
M. Koskela, <i>A characterization of non-negative matrix operators on <math>l^p</math> to <math>l^q</math> with <math>\infty &gt; p \geq q &gt; 1</math></i> .....	165
Kurt Kreith and C. A. Swanson, <i>Conjugate points for nonlinear differential equations</i> .....	171
Shoji Kyuno, <i>On prime gamma rings</i> .....	185
A. Lechicki, <i>On bounded and subcontinuous multifunctions</i> .....	191
Ronald C. Linton, <i><math>\lambda</math>-large subgroups of <math>C_\lambda</math>-groups</i> .....	477
Roberto Longo, <i>A simple proof of the existence of modular automorphisms in approximately finite dimensional von Neumann algebras</i> .....	199
Kenneth C. Millett, <i>Obstructions to pseudoisotopy implying isotopy for embeddings</i> .....	207
William F. Moss and John Piepenbrink, <i>Positive solutions of elliptic equations</i> .....	219
W. O. Murray and L. B. Treybig, <i>Triangulations with the free cell property</i> .....	487
Mitsuru Nakai and Leo Sario, <i>Duffin’s function and Hadamard’s conjecture</i> .....	227
Mohan S. Putcha, <i>Word equations in some geometric semigroups</i> .....	243
L. J. Ratliff, Jr., <i>Polynomial rings and <math>H_i</math>-local rings</i> .....	497
Michael Rich, <i>On alternative rings and their attached Jordan rings</i> .....	511
Walter Rudin, <i>Peak-interpolation sets of class <math>C^1</math></i> .....	267
Elias Saab, <i>On the Radon–Nikodym property in a class of locally convex spaces</i> .....	281
G. Sampson and H. Tuy, <i>Fourier transforms and their Lipschitz classes</i> .....	519
Helga Schirmer, <i>Effluent and noneffluent fixed points on dendrites</i> .....	539
Daniel B. Shapiro, <i>Intersections of the space of skew-symmetric maps with its translates</i> .....	553
E. H. Spanier, <i>Tautness for Alexander–Spanier cohomology</i> .....	561
Alan H. Stein and Ivan E. Stux, <i>A mean value theorem for binary digets</i> .....	565
Franklin D. Tall, <i>Normal subspaces of the density topology</i> .....	579
William Yslas Véléz, <i>Prime ideal decomposition in <math>F(\mu^{1/p})</math></i> .....	589
Stuart Sui-Sheng Wang, <i>Splitting ring of a monic separable polynomial</i> .....	293
James C. S. Wong, <i>Convolution and separate continuity</i> .....	601
