Sumari del volum 56

Articles

P. Bonneau, A. Cumenge, A mi-chemin entre analyse complexe et superanalyse 3

M. D. O'Neill, A geometric and stochastic proof of the twist point theorem 41

T. Fukui, J. J. Nuño-Ballesteros, Isolated singularities of binary differential equations of degree n 65

G. M. Bergman, An inner automorphism is only an inner automorphism, but an inner endomorphism can be something strange 91

V.-A. Nguyên, Green currents for quasi-algebraically stable meromorphic self-maps of $\mathbb{P}^k$ 127

D. Cruz-Uribe, SFO, K. Moen, Sharp norm inequalities for commutators of classical operators 147

A. Hartmann, W. T. Ross, Boundary values in range spaces of co-analytic truncated Toeplitz operators 191

S. Borodachov, Asymptotics for the minimum Riesz energy and best-packing on sets of finite packing premeasure 225

A. Kar, G. A. Niblo, Some non-amenable groups 255

H. M. Al-Qassem, L. C. Cheng, Y. Pan, Boundedness of rough integral operators on Triebel-Lizorkin spaces 261

N. C. Bonciocat, M. Cipu, M. Mignotte, On $D(-1)$-quadruples 279

A. Fossas, M. Nguyen, Thompson's group $\mathcal{T}$ is the orientation-preserving automorphism group of a cellular complex 305

C. Scheven, Elliptic obstacle problems with measure data: Potentials and low order regularity 327

M. Bourdon, Un théorème de point fixe sur les espaces L^p 375

F. Dembegioti, N. Petrosyan, O. Talelli, Intermediaries in Bredon (co)homology and classifying spaces 393

P. Drungilas, A. Dubickas, C. Smyth, A degree problem for two algebraic numbers and their sum 413

K. Auinger, On the power pseudovariety **PCS** 449

A. Ballester-Bolinches, J. Cossey, On non-commuting sets in finite soluble CC-groups 467
