

VOLUME 25 NO. 1 1999-2000

REAL ANALYSIS EXCHANGE

CONTENTS

EDITORIAL MESSAGES	1
CONFERENCE ANNOUNCEMENTS	
Summer Symposium in Real Analysis XXIV	
May 23–27, 2000 in Denton, Texas	3
CONFERENCE REPORT	
Summer Symposium in Real Analysis XXIII	
June 21–26, 1999 in Łódź, Poland	5
RESEARCH ARTICLES	
Aleksander Maliszewski	
On Products of Bounded Quasi-Continuous Functions	185
D. J. Dewsnap and P. Fischer	
Interval Maps and Koenigs' Sequences	205
Jan Kolář	
Simultaneous Extension Operators for the Density Topology	223
Zbigniew Grande	
On A. C. Limits of Decreasing Sequences of Continuous or Right	
Continuous Functions	231
Raymond J. Grinnell	
Functions Preserving Sequence Spaces	239
Peter J. Olver and Robert Raphael	
The Absolute Value of Functions	257
Amiran Gogatishvili	
Fractional Maximal Functions in Weighted Banach	
Function Spaces	291
F. Azarpanah	
Algebraic Properties of Some Compact Spaces	317
R. E. Svetic and H. Volkmer	
The Minimal Denjoy Index of a Symmetric Perfect Set	329
Joanna Kucner, Ryszard J. Pawlak and Bożena Świątek	
On Small Subsets of the Space of Darboux Functions	343
INROADS	
Stanisław Wroński	
On a Family of Functions Defined by the Boundary Operator	359

T. Mitsis	
A Generalization of a Result Due to Havin and Mazýa	363
I. Del Prete, M. Di Iorio, and S. Naimpally	
Essential Fixed Points of Functions and Multifunctions	369
Harry I. Miller and Henry L. Wyzinski	
On Openness of Density Points under Mappings	383
Alberto Alonso and Javier F. Rosenblueth	
Twice Periodic Measurable Functions	387
M. Federson and R. Bianconi	
Linear Integral Equations of Volterra Concerning	
Henstock Integrals	389
Jouni Luukkainen	
The Density Topology is Maximally Resolvable	419
T. H. Steele	
Continuity Structure of $f \mapsto \cup_{x \in I} \omega(x, f)$ and	
$f \mapsto \{\omega(x, f) : x \in I\}$	421
Vasile Ene	
An Improvement of a Recent Result of Thomson	429
Emma D’Aniello	
On the Existence of Vector Measures with Given Marginals	437
Amiran Ambroladze, Klas Markström, and Hans Wallin	
Stability Versus Hyperbolicity in Dynamical and	
Iterated Function Systems	449
Elżbieta Kotlicka	
The Double Difference Property for Some Classes of Functions	463
Márcia Federson	
The Fundamental Theorem of Calculus for Multidimensional	
Banach Space-Valued Henstock Vector Integrals	469
Marianna Csörnyei	
A Note on Strongly Invisible Sets	481
Francis Jordan	
Quasicontinuous Functions with a Little Symmetry	
Are Extendable	485
Zbigniew Duszyński	
The Oscillation Function on Metric Spaces	489

ERRATA

Marek Balcerzak and Joanna Peredko	
Descriptive Character of Sets of Density and \mathcal{I} -Density Points.	
A Correction	493
