CONTENTS

EDITORIAL MESSAGES	i
CONFERENCE ANNOUNCEMENTS	ii
TOPICAL SURVEYS	
Pieter C. Allaart and Kiko Kawamura	
The Takagi Function: a Survey	1
RESEARCH ARTICLES	
Márton Elekes	
A Covering Theorem and the Random-Indestructibility	
of the Density Zero Ideal	55
Francesco Calabrò, Antonio Corbo Esposito, and Carmen Perugia	
Binomial Measures and their Approximations	61
Martial R. Hille	
Resonances for Graph Directed Markov Systems	83
Loredana Biacino	
Box Dimension of the Limit of Hölder Functions	117
Eugen J. Ionascu and Richard Stephens	
Moments and the Range of the Derivative	129
R. S. Pathak	
Variation-Diminishing Wavelets and Wavelet Transforms	147
Michael McAsey and Libin Mou	
Remarks on the Continuity of Functions of Two Variables	167
N. Merentes and J. L. Sánchez	
BV_p -Functions and Change of Variable	177
INROADS	
Russell A. Gordon	
Least Squares and Approximate Differentiation	189
John C. Georgiou	
On an Example of a Function with a Derivative which	
does not have a Third Order Symmetric	
Riemann Derivative Anywhere	203
G. Beer and S. Naimpally	
Uniform Continuity of a Product of Real Functions	213
Brian S. Thomson	
On Riemann Sums	221
