

VOLUME 22 NO. 2 1996–97

REAL ANALYSIS EXCHANGE

CONTENTS

EDITORIAL MESSAGES	443
CONFERENCE ANNOUNCEMENTS	
Summer Symposium in Real Analysis XXII	
June 23–27, 1998 in Santa Barbara, California	444
Special Session in Real Analysis	
March 13–16, 1998 in Louisville, Kentucky	445
TOPICAL SURVEYS	
A. Rodenhausen, H. Peitgen and G. Skordev	
Self-affine curves and sequential machines	446
Richard G. Gibson and Tomasz Natkaniec	
Darboux like functions	492
RESEARCH ARTICLES	
D. N. Sarkhel	
A unified scale of absolute and non-absolute integrals	534
Hung Nhon Vuong	
Measure linearity of bi-Lipschitz maps of self-similar Cantor sets	574
Bozena Swiatek	
Extending Darboux functions with finite variation	590
Mark McClure	
The Hausdorff dimension of the hyperspace of compact sets	611
Claude-Alain Faure and François Guénard	
Upper and lower approximations of Perron integrable functions	626
Vasile Ene	
Local systems and Taylor’s theorem	638
Joseph D. Masters	
The perimeter-minimizing enclosure of two areas in S^2	645
Craig Knuckles and Peter R. Wolenski	
C^1 selections of multifunctions in one dimension	655
Lee Peng Yee and Ng Wee Leng	
The Radon-Nikodým Theorem for the Henstock integral in the Euclidean space	677
Vasile Ene	
On Borel measurable functions that are VBG and (N)	688
Francis Jordan	
Cardinal invariants connected with adding real functions	696
Vasile Ene	
Riesz type theorems for general integrals	714
Lee Peng Yee and Zhao Dongsheng	
Upper and lower Henstock integrals	734
P. S. Bullen and D. N. Sarkhel	
Properties of derivative-like functions	740
Zbigniew Grande	
On functions of two variables equicontinuous in one variable	760
E. D’Aniello, A. Hirshberg, K P. S. Bhaskara Rao, R. M. Shortt	
Bounded common extensions of vector measures	766

Zoltán Buczolich	
Another note on the gradient problem of C. E. Weil	775
László Zsilinszky	
Superporosity in a class of non-normable spaces	785
INROADS	
Inder K. Rana	
On approximate unsmoothing of functions	798
James Foran	
A note on convergence in measure	802
Aleksandra Katafiasz and Tomasz Natkaniec	
A new variant of Blumberg's theorem	806
Andrzej Nowik	
On a measure which measures at least one selector for every uncountable subgroup	814
Aleksander Kharazishvili	
On some subsets of spaces equipped with transformation groups	818
R.C. Dalang and T. Mountford	
Points of increase of functions in the plane	833
Jiling Cao and Julian Dontchev	
On some weaker forms of continuity for multifunctions	842
Marianna Csörnyei	
On the chord set of continuous functions	853
Yôto Kubota	
Notes on absolutely convergent integration	856
