

VOLUME 21 NO. 2 1995–96

REAL ANALYSIS EXCHANGE

CONTENTS

EDITORIAL MESSAGES	383
CONFERENCE ANNOUNCEMENTS	384
TOPICAL SURVEY	
W. Grudziński, B. Koszela, T. Świątkowski, W. Wilczyński Classes of continuous real functions (II)	386
RESEARCH ARTICLES	
A. Katafiasz Improvable discontinuous function	407
R. J. Pawlak On c -homotopies	424
A. Katafiasz Properties of the class of improvable functions	430
C. Freiling and B. S. Thomson Scattered sets, chains and the Baire Category Theorem	440
K. Ciesielski and I. Reclaw Cardinal invariants concerning extendable and peripherally continuous functions	459
V. Kanovei and M. Reeken Summation of divergent series from the nonstandard point of view	473
K. Flak, R. J. Pawlak and B. Świątek On some method for improving continuity, quasi-continuity and the Darboux property	498
V. A. Skvortsov and B. S. Thomson Symmetric integrals do not have the Marcinkiewicz property	510
W. F. Pfeffer The generalized Riemann-Stieltjes integral	521
A. Maliszewski On products of a.e. continuous derivatives	548
Seng-Kee Chua Weighted Sobolev inequalities of mixed norm	555
D. L. Renfro Porosity, nowhere dense sets and a theorem of Denjoy	572
P. Zakrzewski Extending isometrically invariant measures on \mathbb{R}^n — a solution to Ciesielski’s query	582
G. J. Sinnamon Kufner’s conjecture for higher order Hardy inequalities	590
B. Bongiorno and T. V. Panchapagesan On the Alexiewicz topology of the Denjoy space	604
H. Fast The injectivity of the Crofton transform	615
F. Balibrea and J. Smítal A characterization of the set $\Omega(f) \setminus \omega(f)$ for continuous maps of the interval with zero topological entropy	622
H. Cuenya and M. Marano A characterization of Orlicz functions producing an additive property	629
Z. Grande On equi-derivatives	637

M. Repický	
Towers and permitted trigonometric thin sets	648
B. Bongiorno, L. Di Piazza and V. Skvortsov	
A new full descriptive characterization of Denjoy-Perron integral	656
V. Jiménez López	
An explicit description of all scrambled sets of weakly unimodal functions of type 2^∞	664
H. Haase	
Chaotic maps in hyperspace	689

INROADS

W. Kosek	
On “Lipschitz” subspaces of the space of continuous functions	696
C. Freiling and B. S. Thomson	
Scattered sets and gauges	700
H. Shi	
Some typical properties of symmetrically continuous functions, symmetric functions and continuous functions	708
A. Kharazishvili	
Some remarks on additive properties of invariant σ -ideals on the real line	715
J. Borsík	
Remarks on functions preserving convergence of infinite series	725
J. Foran	
Measure preserving continuous straightenings of fractional dimensional sets	732
R. W. Vallin	
More on the metric space of metrics	739
A. B. Kharazishvili	
On the Steinhaus property for invariant measures	743
J. Wolnicka	
Quasi-uniform convergence of sequences of 1-improvable discontinuous functions	750
V. Ene	
A note on an assumption of P. Y. Lee and T. S. Chew	755
J. Jasinski	
Large sets containing copies of small sets	758
Y. Lin	
On the equivalence of McShane and Lebesgue integrals	767
I. Fleischer	
The convergence content of the integral convergence theorem	771
R. A. Gordon	
An iterated limits theorem applied to the Henstock integral	774
M. Balcerzak, W. Wojdowski, and D. Renfro	
On unions of porous sets	782
A. Olevskii and C. E. Weil	
A continuous function not twice Peano differentiable on any perfect set	789
A. Boccuto and A. R. Sambucini	
On the De Giorgi — Letta integral with respect to means with values in Riesz spaces	793
J. Hejduk	
On the density topology with respect to an extension of Lebesgue measure	811
D. Waterman	
An integral mean value theorem for regulated functions	817
