

THE ROCKY MOUNTAIN JOURNAL OF MATHEMATICS

Volume 4

Spring 1974

Number 2

CONTENTS

Introduction

By WILLIAM B. JONES 135

Remarks on the life of Professor H.S. Wall

By WALTER T. SCOTT 137

Invited Papers

Certain invariance and convergence properties of the Padé
Approximant.

By GEORGE A. BAKER, JR. 141

Variational approach to the Theory of Operator Padé Approximants

By J.D. BESSIS AND J.D. TALMAN 151

Applications of Padé Approximation to Numerical Integration

By J.S.R. CHISHOLM 159

The interpolation of Pick Functions

By WILLIAM F. DONOGHUE, JR. 169

The Padé table of meromorphic functions of small order with
negative zeros and positive poles

By ALBERT EDREI 175

Critical point phenomena - The role of series expansions

By MICHAEL E. FISHER 181

Continuation of functions beyond natural boundaries

By JOHN L. GAMMEL 203

Bounds for matrix moments

By GENE H. GOLUB 207

Matrix interpretations and applications of the continued
fraction algorithm

By WILLIAM B. GRAGG 213

On computational applications of the theory of moment problems

By SVEN-AKE GUSTAFSON 227

Analysis of truncation error of approximations based on the
Padé table and continued fractions

By WILLIAM B. JONES 241

Rational approximations with applications to the solution of
functional equations

By YUDELL L. LUKE 251

<i>P</i> -fractions and the Padé table	
By ARNE MAGNUS	257
Some applications of Padé approximants to quantum field theory models	
By D. MASSON	261
The convergence of certain Padé approximants	
By J. NUTTALL	269
A survey of recent convergence results for continued fractions	
By W.J. THRON	273
The role of the pole in rational approximation	
By J.L. WALSH	283
Modified moments and Gaussian quadratures	
By JOHN C. WHEELER	287
Some recent developments in the theories of continued fractions and the Padé table	
By P. WYNN	297
Convergence of Padé approximants in the general case	
By J. ZINN-JUSTIN	325
<i>Contributed Papers</i>	
The bounding properties of the multipoint Padé approximant to a series of Stieltjes	
By MICHAEL BARNSELY	331
Some results and applications about the vector ϵ -algorithm	
By CLAUDE BREZINSKI	335
Rational approximants for inverse functions of two variables	
By C.L. CRITCHFIELD AND J.L. GAMMEL	339
Remarks on basic classes of C^∞ functions	
By R.B. DARST	351
Continued fraction solutions of the general Riccati differential equation	
By HOMER G. ELLIS	353
Continued fraction solution to Fredholm integral equations	
By WYMAN FAIR	357
A priori truncation error estimates for continued fractions $K(1/b_n)$	
By DAVID A. FIELD	361
Stieltjes type continued fractions in quantum electrodynamics	
By S. GRAFFI AND V. GRECCI	363
Continued fractions in Banach spaces	
By T.L. HAYDEN	367

An application of linear programming to rational approximation	
By E.H. KAUFMAN, JR. AND G.D. TAYLOR	371
Solution of the schrödinger equation using Padé approximants to	
sum asymptotic series	
By J.H. MCGUIRE, J.E. GOLDEN AND J. NUTTALL	375
Lower bounds for polynomial approximants to rational functions	
By S.J. POREDA AND G.S. SHAPIRO	377
Diophantine approximation in a vector space	
By F.A. ROACH	379
A note on the use of a continued fraction for perturbation theory	
By D.F.SCOFIELD	383
Application of two-point Padé approximants to some solid state	
problems	
By PING SHENG	385
Sequences of irrational fraction approximants to some	
hypegeometric functions	
By L.R. SHENTON	387
T-fractions from a different point of view	
By HAAKON WAADELAND	391
Extrapolation to the limit by using continued fraction interpolation	
By LUC WUYTACK	395
