

THE ROCKY MOUNTAIN
JOURNAL OF MATHEMATICS

Volume 4

Winter 1974

Number 1

CONTENTS

Introduction	
By RICHARD B. THOMPSON	1
On some old problems of fixed point theory	
By ROBERT F. BROWN	3
Fixed point theory via semicomplexes	
By RICHARD B. THOMPSON	15
Zur theorie P -beschränkter Operatoren	
By ERICH BOHL	31
Quasilinear equations and equations with large nonlinearities	
By JANE CRONIN	41
A remark on simple path fields in polyhedra of characteristic zero	
By EDWARD FADELL	65
Fixed point theorems for contraction mappings with applications to nonexpansive and pseudo-contractive mappings	
By JUAN A. GATICA AND W.A. KIRK	69
The Nielson fixed point theory for noncompact spaces	
By U. KURT SCHOLZ	81
Upper and lower bounds for the number of solutions of functional equations involving k -set contractions	
By J.W. THOMAS	89
Monotone surjections having more than one fixed point	
By L.E. WARD, JR.	95
Bibliography of recent papers on fixed point theory	107
