

ROCKY MOUNTAIN JOURNAL OF MATHEMATICS

Volume 47

2017

Number 7

CONTENTS

Albime triangles over quadratic fields
BY JASBIR S. CHAHAL AND JAAP TOP 2095

Some variations of multiple zeta values
BY CHAN-LIANG CHUNG AND MINKING EIE 2107

A hierarchy for closed n -cell complements
BY ROBERT J. DAVERMAN AND SHIJIE GU 2133

A weak convergence theorem for mean nonexpansive mappings
BY TORREY M. GALLAGHER 2167

Localization operators for the windowed Fourier transform associated with singular partial differential operators
BY NADIA BEN HAMADI 2179

Amitsur's property for skew polynomials of derivation type
BY CHAN YONG HONG, NAM KYUN KIM, YANG LEE
AND PACE P. NIELSEN 2197

On the maximal independence polynomial of certain graph configurations
BY HAN HU, TOUFIK MANSOUR AND CHUNWEI SONG 2219

A monodromy criterion for a type of degenerate system defined by the sum of two homogeneous vector fields
BY TUSEN HUANG AND LIJUN ZHANG 2255

The ideal of unconditionally p -compact operators
BY JU MYUNG KIM 2277

Blow-up of multi-componential solutions in heat equations with exponential boundary flux
BY FENGJIE LI, SHIMEI ZHENG AND BINGCHEN LIU 2295

Lower semi-continuity of entropy in a family of K3 surface automorphisms
BY PAUL RESCHKE AND BAR ROYTMAN 2323

Global existence and uniqueness of a classical solution to some differential evolutionary system
BY LUCJAN SAPA 2351

CONTENTS CONTINUED ON LAST PAGE

Archimedean aspects of Siegel modular forms of degree 2 BY RALF SCHMIDT	2381
Existence of rotating-periodic solutions for nonlinear systems via upper and lower solutions BY XUE YANG, YU ZHANG AND YONG LI	2423
