ROCKY MOUNTAIN JOURNAL OF MATHEMATICS

Volume 49 2019 Number 5

CONTENTS

Perturbed obstacle problems in Lipschitz domains: linear stability and nondegeneracy in measure
By Ivan Blank and Jeremy LeCrone 1407

Symmetric diophantine systems and families of elliptic curves of high rank
By Ajai Choudhry 1419

Lattice-ordered groups generated by an ordered group and regular systems of ideals
By Thierry Coquand, Henri Lombardi and Stefan Neuwirth . . . 1449

On the projective dimension of 5 quadric almost complete intersections with low multiplicities
By Sabine El Khoury 1491

On the integer transfinite diameter of intervals of the form $\left[\frac{r}{s}, u\right]$ or $\left[0, (\sqrt{a}-\sqrt{b})^2\right]$ and of Farey intervals
By V. Flammang 1547

A uniqueness theorem for the Nica–Toeplitz algebra of a compactly aligned product system
By James Fletcher 1563

Existence and smoothness results for a new class of n-dimensional Navier-Stokes equations
By Rim Jday, Zennir Khaled and Svetlin G. Georgiev 1595

Existence of traveling wave solutions in a stage structured cooperative system on higher-dimensional lattices
By Kun Li 1617

Exponents of primitive companion matrices
By Monimala Nej and A. Satyanarayana Reddy 1633

CONTENTS CONTINUED ON LAST PAGE

Separability properties of singular degenerate abstract differential operators and applications
By Veli B. Shakhmurov 1647

Means, moments and Newton's inequalities
By R. Sharma, A. Sharma, R. Saini and G. Kapoor 1667

Effective divisor classes of a projective plane bundle over an elliptic curve
By Tomokuni Takahashi 1679

Global existence and exponential decay for a viscoelastic Petrovsky system
By Yaojun Ye 1709

Existence of solutions for quasilinear Kirchhoff type problems with critical nonlinearity in $\mathbb{R}^N$
By Jing Zhang and Alatancang Chen 1725
