The Review of Modern Logic
A Journal about Symbolic Logic

Volume 10 Numbers 3 & 4
Issue 32

Table of Contents

Letter from Our Far Flung Correspondent
Francine F. Abeles, Highlights of ICM 2006 ......................7

Articles
Jan Dejnožka, Are the Natural Numbers Just any Progression? Peano, Russell, and Quine ............................91

Reviews
Reviews, edited by Francine F. Abeles .......................113
Books Received ...............................................114
Irving H. Anellis: Handbook of the History of Logic. Volume 1: Greek, Indian and Arabic Logic, edited by Dov M. Gabbay and John Woods..................................................117
Irving H. Anellis: Logika. Biobibliograficheskii spravochnik, authored and compiled by Olga Arkadevna Antonova, Aleksei Sergeevich Miloslavov, and T. E. Sokhor .................143
Natan Berber: Philosophy and Logic: In Search of the Polish Tradition: Essays in Honour of Jan Wolénski on the Occasion of His 60th Birthday, edited by J. Hintikka, T. Czarnecki, K. Kijania-Placek, T. Placek, and A. Rojszczak† .......................................149
Jean-Yves Béziau: From Peirce to Skolem: A Neglected Chapter in the History of Logic, by Geraldine Brady ...........155
John P. Burgess: Truth, Thought, Reason: Essays on Frege, by Tyler Burge ......................................................163
John W. Dawson, Jr.: The Essential Turing: Seminal Writings in Computing, Logic, Philosophy, Artificial Intelligence, and Artificial
Life plus The Secrets of Enigma, by Alan M. Turing (author) and B. Jack Copeland (editor) .......................................................... 179

David DeVidi: Trends in Logic: 50 Years of Studia Logica, edited by Vincent F. Hendricks and Jacek Malinowski ............................ 183

Thomas Drucker: Some Interesting Memories: A Paradoxical Life, by Raymond Smullyan .......................................................... 195

George Englebretsen: Vagueness in Context, by Stewart Shapiro ......................................................................................... 207

Vladik Kreinovich: Automated Model Building, by Ricardo Caferra, Alexander Leitsch, and Nicholas Peltier ............................ 213

Vladik Kreinovich: A Modern Perspective on Type Theory: From its Origins until Today, by Fairouz Kamareddine, Twan Laan, and Rob Nederpelt ............................... 219

Robert Mignone: Lectures in Logic and Set Theory, Volume I: Mathematical Logic, by George Tourlakis .............................. 225

Wim Ruitenburg: The Honors Class: Hilbert's Problems and Their Solvers, by Benjamin H. Yandell ................................. 231

Paul Rusnock: The Mathematical Works of Bernard Bolzano, translated, with an introduction and commentary, by Steve Russ 239

Dirk Schlimm: Gödel's Theorem: An Incomplete Guide to Its Use and Abuse, by Torkel Franzén .............................................. 257
