

SUT JOURNAL OF MATHEMATICS

Volume 55, Number 2

December 2019

CONTENTS

Takayuki Yamada:

Constrained linear discriminant rule for classification of two groups via the Studentized classification statistic W for large dimension 69

Masanari Kida:

Algebraic extensions attached to algebraic tori of relative norm 95

Takuya Yoshimoto, Kouji Tahata, Yusuke Saigusa and Sadao Tomizawa:

Quasi point-symmetry models based on f -divergence and decomposition of point-symmetry for multi-way contingency tables 109

Takatoshi Sugiyama, Masashi Hyodo, Hiroki Watanabe, Shin-ichi Tsukada and Takashi Seo:

Test for equality of generalized variance in high-dimensional and large sample settings 139
