

SUT JOURNAL OF MATHEMATICS

(Formerly TRU MATHEMATICS)

CONTENTS OF VOLUME 59 (2023)

Ishida, H. Homogenization for Poisson equations in domains with concentrated holes	61
Itagaki, T. Batalin-Vilkovisky algebra structures on the Hochschild cohomology of self-injective Nakayama algebras	33
Kajiwara, N. Maximal regularity for the heat equation with various boundary conditions in an infinite layer	73
Kanazawa, R. Parameter estimation and forecasts for an integrated Lee-Carter model	91
Katayama, Y. Hecke L -functions of certain subextensions in an extraspecial extension	1
Kunugi, N. Splendid Morita equivalences for the principal 2-blocks of 2-dimensional general linear groups in non-defining characteristic	117
Kurosawa, T. (See Kanazawa, R.)	
Maeda, M. Asymptotic stability of soliton for discrete nonlinear Schrödinger equation on one-dimensional lattice	11
Matsui, A. (See Kajiwara, N.)	
Suzuki, K. (See Kunugi, N.)	
Yoneda, M. (See Maeda, M.)
