

CONTENTS

| | |
|---|-----|
| Makoto Takahashi: Representations of normalizer subgroups of maximal tori of the classical group of type C | 1 |
| Yuuki Tadokoro: A nontrivial algebraic cycle in the Jacobian variety of the Fermat sextic | 29 |
| U-Hang Ki, Hiroyuki Kurihara and Ryoichi Takagi: Jacobi operators along the structure flow on real hypersurfaces in a nonflat complex space form..... | 39 |
| Tomohiro Kamiyoshi: A characterization of finite prehomogeneous vector spaces of D_4 -type under various scalar restrictions | 57 |
| Akira Kamibeppu: Subcomplexes of box complexes of graphs..... | 79 |
| Shingo Ibuka, Hirotaka Kikyo, and Hiroshi Tanaka: Quantifier elimination for lexicographic products of ordered abelian groups..... | 95 |
| Takefumi Igarashi and Noriaki Umeda: Nonexistence of global solutions in time for reaction-diffusion systems with inhomogeneous terms in cones..... | 131 |
| Shinetsu Tamura and Nobuhiro Innami: Circular billiards and parallel axiom in convex billiards..... | 147 |
| Hisashi Kojima: The lifting of elliptic modular forms to Hilbert modular forms and Petersson inner products..... | 161 |
| Masaya Ouchi: A classification of reductive prehomogeneous vector spaces with trivial representation free..... | 177 |
