

**CONTENTS**

Takashi Shimomura: Aperiodic homeomorphisms approximate chain mixing endomorphisms on the Cantor set.....	173
Naotsugu Chinen and Tetsuya Hosaka: Asymptotic dimension and boundary dimension of proper CAT(0) spaces.....	185
Chahrazede Baba-Hamed and Mohammed Bekkar: On the Gauss map of surfaces of revolution in the three-dimensional Minkowski space....	193
Jiryo Komeda and Akira Ohbuchi: Weierstrass gap sequences at points of curves on some rational surfaces.....	217
Koji Nuida: On finite factors of centralizers of parabolic subgroups in Coxeter groups .....	235
Katsuro Sakai and Hanbiao Yang: The box topology of infinite simplicial complexes .....	295
Kazuaki Taira: Semilinear degenerate elliptic boundary value problems via critical point theory .....	311
Xinxing Wu and Peiyong Zhu: Dense chaos and densely chaotic operators .....	367
