

CONTENTS

Ryōzō Yokoyama: Convergence of moments in the central limit theorem for stationary ϕ -mixing sequences	1
Makoto Fukunaga: Fixed points of elementary subgroups of Chevalley groups acting on trees	7
Larry K. Graves: On codimension one isometric immersions between indefinite space forms	17
Masaaki Homma: On the equations defining a projective curve embedded by a non-special divisor	31
Jun Morita: Tits' systems in Chevalley groups over Laurent polynomial rings.....	41
Masazumi Hanazawa: On a problem about Skolem's paradox of Takeuti's version.....	53
Shigeaki Tsuyumine: Constructions of modular forms by means of transformation formulas for theta series	59
Michio Shimura: A limit theorem for conditional random walk.....	81
